Reflecting on the Publication of Corporate Report 2023

KITZ has been publishing an integrated report (Corporate Report) since 2016. In addition to management strategy and financial information, the report integrates ESG and other non-financial information in a comprehensive and systematic fashion, and is compiled as a communication tool to promote understanding of the KITZ Group, including its growth potential.

Corporate Report 2023 is made up of details on the KITZ Group’s value creation in the short, medium and long term based on the unique story of KITZ centering on the Long-term Management Vision ‘Beyond New Heights 2030 - Change the Flow’ and the first Medium-term Management Plan 2024 (FY2022-2024), which were announced in February 2022.

In compiling this report, we made reference to the Integrated Reporting Framework presented by the Value Reporting Foundation (VRF) and Guidance for Collaborative Value Creation announced by the Ministry of Economy, Trade and Industry of Japan. Related departments have engaged in cooperative efforts spanning the company to compile this report to confirm the validity of the compilation process and the information described herein.

KITZ will make use of this report as a tool for engaging in dialogue with all manner of stakeholders, including shareholders and investors, and will endeavor to further enhance our corporate value. In addition, to ensure management transparency and give readers insight into improvements to corporate value through sustainable growth and initiatives aimed at solving social issues, we will also make timely and appropriate disclosures outside this report using tools including our website, securities reports, shareholder notices and environmental report digests.

Toshiyuki Mutasawa

We will aim to achieve our Long-term Management Vision with proactive management and the united efforts of all employees.

Makoto Kohno
President and CEO
Achieving Record Net Sales under the Difficult Environment of the Fiscal Year under Review (FY2022)

It has now been two years since I was appointed President and CEO of KITZ Corporation. Over this time, various events that have shaken the global economy have played out, including the global COVID-19 pandemic and intensifying conflict between the U.S. and China.

Under these circumstances, our business environment also underwent rapid change, requiring us to respond with urgency.

In FY2022, geopolitical risks became prominent with Russia’s invasion of Ukraine. With disrupted supply chains, growing inflation due to soaring prices of energy resources and raw materials, and the depreciation of the yen, it was a year in which the future was even more uncertain.

Over this period, embracing “quick and decisive” as our slogan, we have aimed for management that overcomes these difficulties. In our mainstay Valve Manufacturing Business, we saw strong domestic and overseas performance for semiconductor manufacturing equipment against a backdrop of growing semiconductor demand, with higher sales volumes in the Americas and ASEAN regions also helped by the weakening yen. We also managed to cover the sharp rise in raw material prices with price revisions early on. I believe this was possible due to the brand power that KITZ holds, as well as the relationship of trust it has built with customers.

Similarly, in Brass Bar Manufacturing Business, we managed to increase net sales by implementing price revisions in response to the rising raw materials market while focusing on expanding sales.

As a result of these efforts, net sales rose 17.8% year on year to ¥159,914 million, a record high. Operating income was ¥11,051 million, up 22.9% year on year, while ROE was 10.0%, surpassing our initial forecast for FY2022 in the first Medium-term Management Plan 2024 (FY2022-2024) that was announced in February 2022.

Management Plan for the Current Fiscal Year (FY2023) in Anticipation of the Medium and Long Term

We advocate ROIC × ESG Management, placing the improvement of return on invested capital over the medium to long term as the cornerstone of our sustainability management, which aims to achieve improved corporate value in tandem with higher social value. We aim to achieve our targets by setting ROE for our stakeholders and ROIC internally as our key performance indicators (KPIs).

Net sales in FY2022 even managed to exceed our numerical targets for FY2024, the final year of our first Medium-term Management Plan.

In response, we set our numerical targets for FY2023 to

net sales of ¥167.0 billion, a 4.4% year-on-year increase; operating income of ¥11.9 billion, up 7.7%; and an ROE of at least 9%. In FY2024, we will aim for net sales of ¥170.0 billion with operating income of ¥13.0 billion and an ROE of at least 9%.

Underpinning these figures are growth sectors, primarily the semiconductor market. A brisk semiconductor business not only benefits semiconductor manufacturing equipment but also leads to broad demand in other areas such as data centers and ultrapure water plants. Additionally, in the petrochemical market in which we have traditionally excelled, a shift to fine chemicals with high added value is expected, raising the prospects of significant growth.

In response to these developments, KITZ SCT, which manufactures and sells valves for semiconductor manufacturing equipment, has constructed a new plant building that began operating in April 2023. Meanwhile, KITZ Micro Filter, which produces and sells filters for semiconductor photoresists, is also working on the construction of a new plant building with the aim of beefing up production capacity to meet vigorous demand. These improvements to production capacity will start contributing to business results in the third year of our Medium-term Management Plan and beyond.

Currently we are also actively working on new businesses. From January 2023, Hydrogen Department was elevated to Hydrogen Division in order to pursue hydrogen-related business in earnest. Previously, projects related to water treatment had been implemented on an individual basis by each Group company, but to unify our elemental technologies and products for creating greater synergy, the Environmental Solutions Division has been launched as a new entity at KITZ.

<td>• Build a management system that is transparent and capable of quick decision-making</td>
</tr>
</tbody>
</table>

Set “improving return on invested capital over the medium to long term” as the core management objective, and manage ROE externally and ROIC internally as the main KPIs.

Aim to enhance both corporate value and social value.
Focusing on Risk Management

Meanwhile, analyzing risk factors and minimizing those risks are key points to achieving our plans. I think of risk management as my most important role. I am aware that the uncertain management environment will continue due to global economic trends such as inflation, rising interest rates, exchange rate fluctuations, and supply chain issues. Further, we must now also face emerging geopolitical risks.

As KITZ currently has four production sites in China and another site in Taiwan, there is a need to pay attention to the relationship between China and Taiwan, as well as between the U.S. and China. As a contingency, we are developing systems enabling some products currently produced in China to be produced in Japan. We will also make progress in reviewing our production systems, including the decision to relocate some of the production underway in China and Taiwan to Vietnam.

We are also focusing on improved supply chain management in coordination with production. At times last year, our customers were inconvenienced due to supply chain disruptions. Previously, we had been managing production control and purchasing separately but now we have established a new department to oversee the supply chain and enabled a centralized management system. We are in the process of creating a system that will give us a bird’s-eye view of the situation from the formulation of production plans based on sales targets to cooperation with suppliers and changes to production sites to avoid geopolitical risks.

Development of a Rewarding Workplace

Human capital is one of the factors to achieve our plans. It depends on how well we can cultivate employees engaged with a positive attitude toward their work. To achieve that, we need to properly take stock of our human capital, discover talented employees, and hone their abilities across various departments and regions, including overseas.

Another perspective is improving employee engagement scores. Looking at engagement scores, in FY2022, KITZ scored 48 points for a rewarding work culture and 44 points for a better work environment. This level is not something to be particularly proud of. Our challenge is to improve the scores of younger generations and employees at production sites. Boosting engagement by creating an open workplace is vital to achieving our Medium-term Management Plan.

How can we foster a sense of trust in senior employees and supervisors, how can we link employees’ own jobs with achieving the company’s plans, and how can employees themselves advance their own career plans? The division managers are now leading efforts to visualize those questions.

As a part of that initiative, we set up the KITZ Group Engagement Forum 2022, events for dialogue between top management and employees. Around 40 of these forum events were held at KITZ and the Group companies in Japan and overseas. I gave direct explanations of the Long-term Management Vision and Medium-term Management Plan we announced in February 2022, giving employees the opportunity to think about these as their own. The sessions also emphasized dialogue, and around half of their running time was taken up answering questions from employees. This has enabled employees to ask directly about the issues they are regularly facing and put forth proposals, and we have started to see positive results. Through these initiatives, in FY2024, we aim to score 56 points in rewarding work culture and 55 points in a better work environment. I see KITZ’s greatest strength as its serious and sincere corporate culture epitomized by an element of its Action Guide: Do it True. We will engage in fair and equitable corporate activities which ensure that each employee understands the need to observe internal rules, social ethics, and morals and which meet the expectations of society and earn its trust. This is directly connected with the job satisfaction of employees.

Group-wide, KITZ employees number more than 5,300, half of whom work overseas. We must foster the same KITZ corporate culture at overseas sites as we do in Japan and develop a fulfilling work environment. I think we must also actively pursue personnel exchanges, having employees come from overseas to work in Japan, and vice versa.

Creating women’s opportunities for active roles is another important effort. We have set the target of raising the percentage of female managers, which was 3.4% in FY2022, to 10% by FY2024. I want KITZ to be a company where a diverse range of talent can succeed irrespective of gender, age, nationality, or culture.

Implementing Proactive Management toward 2030

In 2021, my appointment as President & CEO coincided with our 70th anniversary. The first task I set about was to revise the KITZ’ Statement of Corporate Mission to make it more purposeful and clearer. Revisions to our corporate mission led to the formulation of our Long-term Management Vision and Medium-term Management Plan.

Then in February 2022, we announced our Long-term Management Vision “Beyond New Heights 2030 – Change the Flow.” As quantitative targets for 2030, we aim to achieve an average sales growth rate of at least 4%, with net sales in the ¥200 billion range, an ROE of at least 10% and net income of around ¥10 billion.

To achieve our vision, we will strengthen our foundations
in the Building & Facilities, Petrochemicals and Machinery & Equipment markets that represent our core businesses. To cater to the demands of the times in terms of digitalization and decarbonization, we will accelerate our entry into growth sectors including Semiconductors, Fine Chemicals, and Hydrogen & Clean Energy and aim for ambidextrous management that shifts our business domains. To implement these measures, we have set aside a total budget for investments of ¥80 billion over nine years from 2022 to 2030, 60% of which will be allocated to strategic investments in growth sectors and new areas.

As a measure of digitalization, we will lead BX (business transformation) Task Force activities in which roughly 20% of all employees take part. To take on the challenge of rapidly
In our Long-term Management Vision, we specified key themes in each field of ESG. As an environmental initiative for achieving “3 ZERO (triple zero)”, namely Net Zero CO2 Emissions, Zero Environmental Impact, and Zero Risk.

We have made considerable progress in reducing CO2 emissions. By switching to green electricity, in 2022, we reduced CO2 emissions by 65% compared with FY2013 levels group-wide in Japan, outpacing the original schedule. At this stage, we expect to achieve a reduction of 80% by FY2024 and 90% by FY2030.

In response, we issued Sustainability-Linked Bonds worth ¥10 billion in September 2022. As a way of dealing with the urgent issue of climate change, these corporate bonds use the CO2 reduction rates for Scope 1 and Scope 2 of domestic Group companies as evaluation indicators.

In November 2023, our head office will be relocated from Makuhari Shin Toshin, Mihama-ku in Chiba-shi, Chiba Prefecture to the Shiodome area of Minato-ku, Tokyo. The move will enable us to consolidate over half of the offices and Group companies that are spread throughout Tokyo in order to pursue further synergy and speed up decision-making. It will facilitate communication between employees and help create a better work environment. By consolidating functions in a single office, we also hope the move will have a positive effect on creative ideas and innovations.

My motto is “Fueki Ryuko”, a Japanese phrase that means to incorporate new trends without changing one’s essence. As KITZ’s Slogan on Sustainability states “Create the Future / Preserve the Future,” I hope to be a manager who is able to be proactive in this time of rapid change. As we head to 2030 and beyond, KITZ will continue to evolve in sustainable ways.

Our 70th anniversary was an important milestone, but it was also just a waypoint. We will Change the Flow to adapt to an evolving external environment and aim “Beyond New Heights” toward our upcoming 80th and even 100th anniversaries. Your ongoing support is greatly appreciated.
Driving Three Stages Toward Business Transformation
In the changing social environment, such as population decline and decarbonization, KITZ formulated the Long-term Management Vision to enhance competitiveness and continue to support infrastructure. To make effective use of digital transformation (DX) as the means to achieving the goals of this vision, we have been engaged in Business Transformation (BX) Task Force activities.

These activities are being personally led by the President as a large task force with the participation of roughly 20% of all employees across multiple sections, and involves the implementation of three stages: strengthening existing businesses, changing the management structure, and realizing new business models.

We will strengthen our existing businesses by thorough streamlining, starting with improvements to EX*. The management resources by this process will be visualized, mobilized, and used to enhance CX**.

As indicators of the progress of Task Force activities, we have created BX KPIs that link the activities of each department to management based on an ROIC tree. Using these BX KPIs, we will aim to transform into a customer-oriented and agile organization and develop new business models.

*1 Employee Experience
*2 Customer Experience

Encouraging a Proactive Approach Based on Data-driven Thinking
In the first Medium-term Management Plan, we aim to take ownership of changes and acquire the capability to implement various reforms through a transformation in the environment, ideas, action, and culture.

As the basis for the DX implementation in FY2022, we mainly worked on establishing an optimized management system to create cross-departmental collaboration as the core of transformation, reforming mindset and corporate culture to lay the groundwork for a culture to take root, developing DX human resources to cultivate employees to lead that culture, and enhancing IT infrastructure as a tool to put the above into practice. From FY2023, we will utilize this basis for implementation to drive BX at full scale based on plans for each measure.
Creating Resources for Transformation and Developing DX Human Resources to Lead a New Culture

BX Task Force carries out cross-organizational improvement activities to shift human resources to new businesses as part of business transformation. Through these activities, Task Force members are developing their spirit of innovation and ability to set challenges.

In parallel with the above, DX human resource development is conducted to cultivate key members who will lead future reforms through enlightenment activities and skill development. Enlightenment activities begin with recognizing the need for the reform and broadening one’s perspective. Skill development fosters the ability to identify an issue and its cause and solve them through data analysis training, as well as the ability to analyze the current situation and solve issues on one’s own through citizen development*3 training for RPA and business apps*4.

As of 2022, 200 and 170 employees have undergone data analysis and citizen development training respectively. These DX talents with ability to execute will become the leaders of a new corporate culture.

*3 Citizen development: The development of RPA and applications by users with intimate knowledge of the field in which they work rather than those from an IT department
*4 RPA and business apps: Tools that enable the development of PC task automation or applications through intuitive operations that do not require knowledge of a development language as with conventional system development

Developing the Environments and Tools for Each Employee to Succeed

KITZ has made progress in streamlining operations through the update of mission critical systems and enabled the accumulation of accurate data. In addition, through the upgrading of communication tools, we have changed the way of information sharing internally.

As for BX Task Force activities, we have used these developments as the foundation for actively sharing information to employees and improving awareness of the management situation and management indicators. We have also introduced tools for employees to utilize the accumulated data, such as data platforms and BI tools. Based on the KITZ Group Information Security and Personal Information Protection Policy, we have developed the environments and tools to identify and solve problems in business operations.

We are also pursuing paperless operations by digitizing existing analog data, and have seen each activity steadily bear fruit as the foundation for a new corporate culture to take root.

---

**Optimized Management System**
- Launch of the BX Task Force led by the President, in which 20% of employees participated
- Setting BX KPIs aligned with an ROIC tree

**Mindset and Corporate Culture Reform**
- Shift to indicating targets and progress with numerical data
- Thoroughly sharing information using the intranet portal (management vision, departmental vision, KPIs)
- Promoting digitalization through paperless operations

**DX Human Resource Development**
- Acquiring the abilities to set challenges and solve problems
- Strengthening digital literacy and in-house production skills through internal training

**IT Infrastructure Enhancement**
- Upgrading of systems and communication tools
- Introducing and promoting data visualization and analysis tools
- Developing cloud-based platforms to accumulate data
- Strengthening in-factory information security
- Setting KPIs for digital technology utilization

| Number of DX human resources | Security assessment scores | IT environment user satisfaction |
KITZ Group’s Growth Trajectory

The Kitazawa Factory (now KITZ Corporation) was founded in 1951 when Japan was in the transition period from the chaotic aftermath of the postwar era to the approaching era of high growth. Guided by the founding principle of Toshio Kitazawa (1917-1997), the Company positioned integrated production as the basis of its operations, in which all processes are carried out under one roof, from materials to finished products and from casting through machining, assembly, inspection, and shipment. Furthermore, the Company has built a structure that provides customers with meticulous service and post-sale follow-up. This insistence on “better quality” has been upheld and passed down as the cornerstone of the KITZ Group’s activities. The Group has grown to become one of the world’s pre-eminent corporate groups, developing a solid position as an all-round valve manufacturer that provides a wide variety of products to multiple fields.

* Sales from 1951 to 1976: Non-consolidated

Initial founding, and building a production and sales network

- 1951
  - Toshio Kitazawa founded the Kitazawa Mfg. Works Co., Ltd.
  - The Nagasaka Plant was completed and the manufacture and sales of cast bronze valves started.
- 1952
  - Nationwide distributors’ association was organized, marking the establishment of a distribution system for the domestic market.
- 1959
  - Started manufacturing brass rods.

Expansion of product range and growth into an all-round valve manufacturer

- 1962
  - Company name was changed to Kitazawa Valve Co., Ltd.
- 1967
  - Started manufacturing and selling ductile cast iron valves and stainless steel valves.
- 1968
  - Started manufacturing and selling butterfly valves.
- 1969
  - Started manufacturing and selling cast iron valves.
- 1974
  - Started manufacturing and selling cast steel valves.
- 1977
  - Listed on the Second Section of the Tokyo Stock Exchange.
- 1978
  - KITZ became a registered trademark.

Establishment of the trusted KITZ brand

- 1989
  - The Nagasaka and Ina plants obtained ISO 9001 quality management system certification, making KITZ the first Japanese company to receive this certification.
- 1991
  - Spanish ball valve manufacturer ISO S.A. (currently KITZ Corporation of Europe, S.A.) joined the KITZ Group.

History

- 1951
  - The Nagasaka Plant begins operation in Japan with just 11 employees in a small workshop, not a full factory.
- 1962
  - Japan’s first forged brass valves called FH and FS introduced.
- 1980
  - Introduced a cast bronze valves designed handwheel, “CHRYSANTHEMUM-HANDLE” (See page 30 Focus.).
- 1984
  - Listed on the First Section of the Tokyo Stock Exchange.
- 1999
  - KEEPALOY environmentally friendly lead-free dezincification-resistant brass bars are developed and announced.
In October 1992, we changed our company name from Kitazawa Valve Co., Ltd. to KITZ Corporation, based on global recognition of the KITZ product brand. The name KITZ is a shortened version of the original name Kitazawa (KitaZawa).

**Focus**

- **1992**: Changed name to KITZ Corporation and moved the head office to the Makuhari district of Chiba City.
- **1995**: Shimizu Alloy Mfg. Co., Ltd. joined the KITZ Group, enabling the Group to begin supplying products for water supply systems.
- **2001**: Purchased the semiconductor related business from the former Benkan Group.
- **2002**: Carried out impairment of assets and reconstructed poorly performing business operations.
- **2004**: Separated and reestablished the brass bar manufacturing and microfilter (MF) business as separate entities.
- **2009**: Perrin GmbH, a ball valve manufacturer in Germany, joined the KITZ Group.
- **2012**: Launched ultra-high pressure ball valves for hydrogen stations.
- **2015**: Indian industrial valve manufacturer Micro Pneumatics Pvt. Ltd. joined the KITZ Group.
- **2018**: Brazilian industrial ball valve manufacturer Metalúrgica Golden Art's Ltda. joined the KITZ Group.
- **2022**: Korean industrial butterfly valve manufacturer Cephas Pipelines Corp. joined the KITZ Group.

**Accelerating selection and concentration, and promoting globalization**

- **2008**: Unveiled our Long-term Management Vision.
- **2009**: Selected Prime Market in Tokyo Stock Exchange new market segments.

Growth Strategies

Sustainability
The KITZ Group operates Valve Manufacturing Business that involves the manufacturing and sale of joints, purifiers, and industrial filters with a focus on valves as a type of fluid control device; Brass Bar Manufacturing Business that involves the manufacturing and sale of brass bars used as faucet fittings, gas equipment, and materials for home appliance components; and other businesses including the operation of hotels.

Moving forward, the KITZ Group will continue to pursue further growth as an all-round fluid control device manufacturer with a focus on valves.

Overview of KITZ Group's Business Promotion Structure

Business Segments

Valve Manufacturing Business

Brass Bar Manufacturing Business

Others

Hotel Beniya Co., Ltd.

Supply of Products

Supply of Parts and Materials
**Valve Manufacturing Business**

**Strengths**

**Providing a Wide Range of Products as an All-Round Valve Manufacturer**

With a large number of valve manufacturers specializing in limited markets and fields and narrowing down the manufacturing and sale of valves to particular materials and shapes, the KITZ Group maintains a lineup of valves featuring an array of shapes in various materials including bronze, brass, stainless steel, cast iron, and cast steel. As an all-round valve manufacturer, we offer products that span numerous fields covering every area from our daily lives to industry.

**KITZ Brand as a Mark of High Quality**

The KITZ Group maintains casting equipment designed for the main materials of valves. We manufacture our products on the basis of an integrated production system that covers everything from material selection to casting, machining, assembly and inspection. By developing a quality assurance system that extends back to the materials we use, we have established the position of KITZ as a brand that stands for reliability.

**High Market Share—**

In the domestic market, we have established a strong sales network that can quickly respond to customer feedback through a network of distributors that covers all of Japan. We thus maintain a particularly high market share in bronze, brass, and stainless steel valves.

**Brass Bar Manufacturing Business**

**Strengths**

**Development of New Materials based on Alloy Technologies Cultivated over Many Years**

Our business began with the manufacturing of brass bars, which is a main material of valves. Today, we respond to market needs by actively developing and selling new materials that are friendly toward people and the environment, including dezincified corrosion-resistant brass bars and lead-free brass bars.

---

**Others**

**Strengths**

**Operating One of the Largest Hotels in the Kamisuwa Onsen Hot Springs District**

Our business is service-related operations, focusing on Hotel Beniya, located in Suwa, Nagano Prefecture. In addition to the hotel business, we also operate two service areas: the Suwako service area located along the Chuo Expressway (outbound) and the Tobu Yu-no-maru service area located along the Joshin-etsu Expressway (inbound).

---

**What Are Valves?**

Valves are a general term for fluid control devices that have the function of flowing and stopping fluids (water, air, oil, gas, etc.) in pipes and controlling the flow.

The origin of valves dates back to woodcocks that were excavated from ancient Egyptian ruins dating from around 1000 BC. Around the mid-1800s, when boilers for spinning were imported, metal valves were used for the first time in Japan. At the start of the Meiji era, when water service and town gas service commenced, valve manufacture began in Japan.

Today, valves are connected with diverse pipes in a wide range of fields from those close to our daily life, such as water and sewage, hot-water supply, gas, and air conditioning, to the production processes in industrial fields, such as oil, chemical and pharmaceutical products and food. Valves play an extremely important role. Although we are rarely aware of their existence in our daily life, valves strongly support our life behind the scenes.
Business Results in the Fiscal Year Under Review (FY2022)

In FY2022, we saw a recovery in economic activity with global progress on the COVID-19 pandemic response. However, due to China’s zero-COVID policy, the Russian invasion of Ukraine, and other factors, difficult conditions continued, including supply chain disruptions, soaring energy resources and raw material prices, and the depreciation of the yen. Under these circumstances, we managed to achieve net sales that exceeded our plan in Valve Manufacturing Business, on the back of favorable conditions for semiconductor manufacturing equipment continued in Japan and overseas, price revisions in response to sharply rising raw material prices, increased sales in the Americas and ASEAN regions, and the impact of foreign exchange rates.

On the profit front, the effects of the price revisions offset soaring raw material prices. Favorable conditions for semiconductor manufacturing equipment and increased sales from domestic and overseas markets due to the economic recovery also led to increased profit.

As a result, net sales in Valve Manufacturing Business segment rose by ¥18,434 million year on year to ¥125,189 million. Operating income also increased by ¥2,892 million year on year to ¥14,980 million. This performance represents record highs for both net sales and operating income.

Toward Achieving the Long-term Management Vision

The Long-term Management Vision states a policy of aiming for expanded sales and profit by pursuing core businesses in greater depth and investing resources in growth markets. The first Medium-term Management Plan categorizes the businesses in which the KITZ Group excels as core businesses, namely Building & Facilities, Petrochemicals, Water Treatment, and Machinery & Equipment. We will further enhance the infrastructure of these businesses and lay solid foundations while investing resources in growth markets toward achieving “digitalization” and “decarbonization,” two keywords to solve social issues. Specifically, we have categorized Semiconductor Equipment, Semiconductor Materials (Filters), Fine Chemicals...
and Hydrogen & Clean Energy as target markets, while the Building System Department, Industrial Department, and Fine Chemical Department have executed business strategies for each target market. Additionally, in January 2023, we established the Hydrogen Division and Environmental Solutions Division under the direct control of executive officers. We are preparing to expand our Hydrogen & Clean Energy business in line with the future expansion of the demand, while in Water Treatment, we will leverage the KITZ Group’s water-related technologies, products, and services to provide customers with solutions under our slogan, “Design Future with Water.” We will accelerate initiatives aimed at each growth market while specifying and managing resource allocations in an effort to transform our business portfolio.

Initiatives in the Field of Hydrogen
KITZ began selling valves for hydrogen stations that supply hydrogen gas as fuel for fuel cell vehicles and other uses in July 2012, and in April 2020, entered the packaged unit-type hydrogen station business. In recognition of the development of technologies to reduce the costs of hydrogen stations as part of the ultrahigh pressure hydrogen infrastructure wide-spread adoption and technological development project operated by NEDO*1, and for the technological development of large valves for liquefied hydrogen as part of a project to develop technologies to build a hydrogen society, KITZ was selected by METI*2 as a “Zero-Emission Challenge Company.” In addition, Kawasaki Heavy Industries, Ltd. proposed and was selected for its hydrogen-powered aircraft core technology development project as a “next-generation aircraft development project” as part of NEDO’s Green Innovation Fund, and in November 2021, KITZ was selected by Kawasaki Heavy Industries as a project participant and subcontracted again for the development of valve technologies under hydrogen aircraft engine combustor and system technology development and liquefied hydrogen fuel storage tank development. We will pursue efforts in the field of hydrogen, one of our growth markets, including our aim of contributing to the realization of next-generation aircraft through the development of these technologies.

*1 NEDO: New Energy and Industrial Technology Development Organization
*2 METI: Ministry of Economy, Trade and Industry

Launch of a Monitoring Service
Domestically, there are many plants that were constructed during Japan’s high economic growth periods and are still operating today. Due to their many years of operation, there is a heightened risk of trouble and accidents from deteriorating facilities, which increases the importance of regular inspections, upkeep, and other maintenance tasks for securing safe operations. However, in the field of maintenance work, there are new needs to deal with the aging of experienced engineers and technicians, the decline in the working population, and the spread of infectious disease. As a solution, it is necessary to prevent equipment failures in a way that does not rely on human intervention. Using technologies based on unique sensing algorithms, AI and IoT, KITZ has launched KISMOS (KITZ SMART MONITORING SYSTEM), a monitoring service that detects signs of abnormalities in valves for batch production processes in plants and factories. This will provide a system for providing total support to customers from the selection of valves to planned maintenance. Going forward, KITZ will fully take on the challenge of solutions-oriented businesses.

As a Leading Company in the Valve Industry
As a leading company in the valve industry, KITZ has cultivated advanced technology and a wealth of experience over the course of many years. KITZ utilizes these to meet the diverse needs of customers. KITZ introduced the Valve Meister System for certifying employees who have reached a certain level of skills and knowledge regarding automated valves and metal materials for valves as Valve Meisters. Our Valve Meisters respond to requests for customer consultations and propose specific solutions. KITZ has also offered training programs (group training and online training) for trading companies that handle valves as well as construction companies, customers and plant-related companies to learn the basics of valve technologies. Through practical training in areas such as valve assembly and disassembly, piping, and automatic valve flow tests, along with lectures from veteran engineers with a wealth of practical experience, we will help improve knowledge and skills across the industry.
Supporting the Stable Supply of Water
Water is the source of life and essential for sustaining all lives on the earth, flora and fauna alike. The KITZ Group helps to make people’s daily lives more comfortable by supporting the stable supply of clean and safe water through its safety-conscious products and services.

Evolution of Water Treatment Technology
The KITZ Group is steadily evolving technologies that meet the world’s water infrastructure demands, including water purification technologies that use membranes to clean water, desalination technologies to purify and desalinate water that is not suitable for consumption, such as seawater, and technologies catering to the need for pure water and ultrapure water against the backdrop of an expanding semiconductor market.

Water source
Water purification plants
Water purification devices
Use membrane filter water purification systems to produce safe, delicious-tasting water.

Water meter units
An integrated unit comprised of a water supply meter and joint fittings.

Bronze and brass valves
Utilized by many customers in all manner of fields, including the air conditioning and sanitation of building facilities such as office buildings and hotels, plant production facilities, and machine tools and devices.

Office buildings and Hotels, Hospitals
Apartment houses
Water distribution lines
Pumps
Drainage systems

Resilient seated gate valves
Widely used for water supply and distribution pipelines.

Products for water distribution systems
A broad choice of products including shutoff valves, metal fittings, and snap taps for branching tap water pipes.
Working Toward Solving Water-Related Issues

We work actively on the development of environmentally friendly technologies, such as surface treatment technology to prevent the elution of nickel and lead from valves, and lead-free copper alloy materials, and meet the international standards for water quality. Moreover, our lineup includes equipment that breaks down organic substances dissolved into water by way of ozone, UV light, or photocatalysis, purification devices designed to handle every kind of water source and household water purifiers.

The world faces serious issues related to water resources and shortages. The KITZ Group is marshalling its combined strengths to ensure that all people have access to clean and safe water and is seeking new solutions for various water-related problems by harnessing the Group’s combined capabilities, utilizing every group member’s experience, know-how, technologies, products and services.

Valves for water heaters
- Designed for easy installation on compact, space-saving type for water heaters.

Tap water filters for home use
- Hollow fiber membranes purify tap water. Used for water sources and purification systems.

Water conditioners for commercial applications
- Groundbreaking water treatment devices that use a combination of ozone, UV light, and photocatalysis, together with advanced oxidation treatment

Valves for water supply systems
- Made of special chemical ingredients to minimize or eliminate lead elution into tap water for protection of human health.

Valves for sewage plants
- Gate valves, ball-check valves, and other valves that are essential for treatment of sewage water
Ensuring the Stable Supply of Energy
The KITZ Group provides a wide scope of products that play a key role in providing essential energy resources that keep industry running to oil refineries, petrochemical plants, chemical plants and innumerable other industrial processes through oil and gas pipelines, loading/off-loading terminals and other modes of transportation.

Controlling the Flow of Fluids in Extreme Harsh Environments
At energy plants, valves must be able to withstand severe conditions like extremely high temperatures and pressure with no possibility of failure. Before introducing any new product, the KITZ Group repeats stringent laboratory tests, analyses and evaluations based on actual on-site service environments. Only those products that have passed such verification procedures are added to our product lineup.
For a Clean Energy Society

With the decarbonization of energy picking up speed in the race to carbon neutrality, there is increased interest in liquefied natural gas (LNG), which produces fewer CO₂ emissions during combustion than coal or oil and it can help curb global warming, as well as hydrogen, regarded as the mainstay of next-generation energy. Particularly with regard to hydrogen, we have begun to develop large-sized valves for the high volume transportation of liquid hydrogen and aim to have the KITZ Group’s valves supplied throughout the supply chain for hydrogen.

We are focused on developing eco-friendly products to deliver clean, renewable energy to people all over the world with the aim of contributing to the realization of a decarbonized society.
Research and Development System Creating High Added Value

In order to meet the diverse needs of the times, we take immense pride in producing fluid control devices delivering safety, durability and reliability.

R&D Concept
The KITZ Group’s engineering section is actively and boldly engaged in research and development to realize KITZ’ Statement of Corporate Mission: “We strive to build a robust global environment and sustainable future by supporting societal infrastructure through our advancements in fluid control technologies and materials.”

- Core technologies
  We integrate process technologies in the field of sealing, material, and process engineering that serves as the core of our R&D operations.

- Providing solutions
  We focus on resolving customer problems and provide products and services that please our customers.

- Speed and global network
  We develop new products rapidly by utilizing the worldwide group network to respond to the diverse needs of customers.

To Provide Next-generation Solutions
As part of KITZ’s 70th anniversary project, the KITZ Group Innovation Center was constructed on the grounds of the Chino Plant.

On the second floor, which has an office area for development and design sections, there is ample meeting space. Thanks to the adoption of activity-based working (ABW)*, the space encourages the free and flexible exchange of ideas and knowledge.

In addition, on the third floor, we have set up an “innovation studio” for putting original design ideas that create new value into practice. This will be the starting point for the speedy provision of innovative products and services that will satisfy customers.

*ABW: A working style where people choose their work location based on the nature of the work at the time

Valve Research and Development Process

1. Structural analysis
   The optimal structure of the product is designed by using simulated fluid analysis, stress, or other structural analysis.

2. 3D prototype verification
   Prototypes can be verified at an early stage using 3D printer modeling. Customers can check those prototypes by touch.

3. Casting analysis
   Design for an optimal mold for casting is planned using solidification analysis.

4. Mold design/production
   The CAM* data used to design the molds is transferred to processing equipment, and molds are produced internally.

* Computer Aided Manufacturing
Earning the Trust of Users Globally with World-Class Valve Technologies

The Product Development Department at KITZ is engaged in research and development to provide value to customers in a wide range of fields, including building utilities, petrochemicals, clean energy, water treatment, and semiconductors.

To maximize the synergy of the Group, engineers from Japan, Europe, the Americas, ASEAN, and China collaborate to promote product development and design, utilizing networks such as groupware, and have established a technology structure for design at the optimum sites worldwide. We also develop products with materials and specifications that are compatible with the markets and regulations in each country, and strive to improve efficiency through the active introduction of DX, such as promoting product development according to market needs through centrally managing product drawings, design drawings and component tables through the use of PLM*.

In response to the diverse needs of today’s world, each and every engineer, by raising the level of his or her skills and continuing to take up the daily challenge of value creation, is creating fluid control devices that are outstandingly safe, durable and reliable.

* PLM: Product Lifecycle Management

Sealing Technology and Materials Development Supporting Lifelines in a Wide Range of Fields

KITZ Corporation started operations from manufacturing general-purpose valves. Over the years, KITZ has continually gone a step ahead of the needs of emerging markets and developed high value-added products, advancing from manually operated shut-off valves to automated control valves, and from single valves to complex modular products.

What makes it possible is sealing technology and materials development. Sealing technology has been developed in a wide range of fields from low pressure to ultra-high pressure, from extremely low temperature to high temperature, with up to more than 90,000 products created. The Company has also, based on its know-how cultivated over the long period of its history, developed optimum metal materials and introduced new products through high-level casting technology. These technologies are still evolving.

Sealing technologies, the core of valves

Casting analysis
Mold design/production
Reliability test
Launch of product
Mass production trial
Evaluation of mass production
Mass production

Reliability test
Testing and analysis are carried out under every condition of use.

Cryogenic test
Liquefied natural gas (LNG) is a low-temperature fluid. We conduct tests to reproduce the low temperature conditions.

Fire test
We verify whether valve functions can be maintained, even if a fire occurs and the valve seal materials are burned out completely.

Blow-off test
Significant force is applied for high temperature and high pressure fluid flow control when valves are opened and closed. We verify the durability to ensure that valves can operate properly even under the conditions of application limits.

Low emission test
The company exclusively retains the only methane gas testing facility based on the API standard in Japan and performs external leak tests with actual fluid.
Integrated Production System That Provides Quality Control Starting from Castings

Based on integrated production, the KITZ Group positions castings (forge and foundry materials) that are valve materials as the core technology and produces them internally from castings. We have established an integrated production system in which our Group has its own casting facilities for the main valve materials such as bronze, casting iron, ductile cast iron, stainless steel, and casting steel, thus putting in place a quality assurance system starting from materials. We also provide a wide variety of products in small quantities.

What supports manufacturing operations based on the market-oriented concept is the production method according to the KITZ Innovative and Challenging System (KICS). KICS provides a mechanism of sending only good products to the subsequent process by producing each product one by one in a sequence of processes at the exact timing with which it can be sold. It also achieves the elimination of stagnation and waste in a series of processes from order receipt to production and delivery. Moreover, we strive to further reduce delivery times and reinforce production lines continuously by thoroughly implementing standard work and improving processes.

3D scanners for casting mold production have been introduced at the Nagasaka Plant. The casting molds used in production sites are the result of engineers’ ingenuity and expertise over many years. By utilizing this know-how as data with the use of 3D scanners, we can standardize and improve our casting technology in-house, shorten lead times from casting mold production to product completion, and improve service for customers.

Toward an Eco-friendly Manufacturing Workplace for Creating Added Value

KITZ is investing proactively in R&D for new production technologies to achieve sustainable, eco-friendly production processes. We have expanded efforts to reuse the sand used in the casting process, recycle water resources used in valve inspections, and research eco-friendly paints. To provide customers and society with new added value as quickly as possible, in 2022 a research laboratory was newly established in the KITZ Group Innovation Center on the premises of the Chino Plant, accelerating initiatives for research into these technologies.

Production Systems That Assure High-Quality Products

The KITZ Group’s manufacturing is based on the concept of delivering products when necessary and in the quantities required with better quality.
KITZ Brand is Backed by Quality Management Systems

KITZ Corporation recognized the importance of conformance to the international standard on quality management systems earlier than anyone in the industry. In November 1989, KITZ became the first Japanese company to earn ISO 9001 certification. At present, all domestic and international production bases in the KITZ Group have been certified to this standard. In February 2019, our Group company, KITZ Engineering Service Co., Ltd., became the first in the Group to obtain certification for the scope of “valve maintenance” under the standard. Additionally, in July 2001, KITZ Corporation was certified, for the first time in the valve industry in Japan, in accordance with the Pressure Equipment Directive (PED) for CE marking required for European markets. KITZ plants in Taiwan, Thailand, China, Spain, and Germany have subsequently obtained PED certification as well.

In addition to these international quality standards, in Japan, KITZ Corporation is approved by the Minister of Economy, Trade and Industry as an authorized gas tester under the High Pressure Gas Safety Act. It supplies Japan Industrial Standards (JIS) certified products and complies with the standards of the Japan Water Works Association (JWWA). KITZ plants in Japan and China are also certified to display the API Monogram of the American Petroleum Institute.

Global Production Network: Manufacturing Facilities Located in Optimum Locations

The KITZ Group is building a structure for undertaking production in the most suitable locations for its operations around the world. Under this structure, we produce high value-added products in Japan, while Japan also plays a crucial role as the command center for our global manufacturing activities. The KITZ Group now has international production sites in Thailand, Taiwan, China, Korea, India, Spain, Germany and Brazil. We also revise our production systems flexibly, including a decision to shift a part of production underway in China and Taiwan to Vietnam.

Acid pickling
Pickling castings in acid solution removes impurities such as oxidized scales on the casting surface caused by heat treatment and shot blasting. At the same time, a protective film is formed on the casting surface, enhancing corrosion resistance.

Machining
Castings are cut, drilled and processed with machines.

Assembly
Various parts and components are assembled to complete valves.

Pressure tests
Valves are pressurized with air and/or water and operated to verify that they satisfy the quality requirement.
Extensive and Strong Sales Network

Since our foundation, the KITZ Group has established a strong sales network covering all of Japan. Today, we are working on the development of a global sales network in order to meet customers’ requests with regard to quality, price, delivery, and service.

Full Distribution System
We have developed a sales structure to respond to customer requests immediately through a strong distributors’ network covering all of Japan. These distributors and KITZ are connected via dedicated lines and the Internet. As a result, information on market demand is fed back directly to the production site, and this also achieves marked improvements in business efficiency and the acceleration of business. We have also adopted a pull production system, a system for setting a standard volume of distributor inventory for each product and replenishing the quantity shipped on a daily basis to maintain the inventory at a certain level. With this, distributors do not need to monitor the inventory volume of products for which standard inventory is set and can meet needs for rapid delivery.

KITZ’s Strength in Domestic Sales
KITZ provides a variety of products, from goods familiar in our daily lives to the production processes encompassing industrial fields, through its powerful and wide-ranging sales network.

Customers in each market decide which valve manufacturer they will use. To respond to customer needs with a diverse range of solutions, KITZ listens carefully to usage conditions and the issues customers face to select the most suitable valves and quickly responds with prices and delivery times.

After delivery, we maintain close contact with customers through meticulous support services including technical assistance, parts supply, and on-site inspection and repair.

We build win-win relationships with customers by securing repeat orders from customers and by accepting maintenance requests for existing valve installations.

KITZ Engineering Service Co., Ltd. (KESCO) handles after-sales service. Through coordination between service centers and affiliate companies, we provide smooth and varied maintenance services across Japan.

In February 2019, KESCO acquired ISO 9001 Certification in the scope of the valve maintenance service. In addition, to perform proper maintenance on valves from other manufacturers, we have obtained certifications and qualifications in the valve maintenance from valve manufacturers, including those based overseas.

KESCO is committed to the development of human resources. We have built a system based on on-the-job training where veteran and junior employees form teams so junior employees can gain skills while performing actual maintenance work. KITZ also has extensive support systems in place for employees to obtain qualifications. Acquiring qualifications in the various areas needed for maintenance, such as crane slinging, forklift operation, gas welding, and construction management, is promoted as a part of employee training.

Sales Structure Responsive to the Market Environment
For global markets, we have been strengthening our sales and service systems based on the environment in each market. We have established regional headquarters that provide the functions of sales, marketing, engineering, stock, maintenance, and service for each area, and conduct business close to the region and provide products and services to satisfy local customers’ needs.

In addition to the representative offices in India and UAE, we have established sales bases in China, Hong Kong, Korea, Singapore, Thailand, Malaysia, Vietnam, the United States, Germany, Spain, and Brazil and have developed global sales networks. In order to quickly respond to individual requests from customers, we have developed the KITZ Official Modification Shop network for the modification and repair of valves.
KITZ—A Reliable Brand

The KITZ Group provides a full lineup of products, and our quality is highly regarded by customers in Japan and overseas. Our 12 brands have a presence in virtually all markets and fields centered on the KITZ brand.

A “CHRYSANTHEMUM-HANDLE®” is a symbol of KITZ, the brand of valve reliability.

Created in cooperation with Mr. Sori Yanagi (1915-2011), a prominent Japanese industrial designer. Pursues the ease of holding from the perspective of ergonomics. Because the shape of the finger-holds embodies plumpness that is reminiscent of large chrysanthemum petals, it is nicknamed the “chrysanthemum handle.” It was employed for the design of the handle for bronze valves in September 1980 and has gradually been applied to other products.
What is Brass?
Brass is an alloy of copper (Cu) and zinc (Zn). Modifying the percentages of copper and zinc contained in the alloy and adding various other metallic elements makes it possible to produce numerous superb characteristics, such as electrical and thermal conductivity, corrosion resistance, plastic workability, and machinability.

Brass Bar Manufacturing Business
KITZ Metal Works Corporation, which handles the KITZ Group’s copper products business, develops and supplies the materials for brass valves, and also manufactures and sells high-quality brass bars and fabricated items, which are used widely as materials for faucet metal fittings, and components in gas supply equipment, home appliances and auto parts.

Hokuto Giken Kogyo Corporation manufactures and sells cut parts and brazed workpieces.

Development of Environmentally Friendly New Materials
In recent years, stricter regulations concerning substances that impact the environment have been introduced around the world. In Europe, in particular, lead regulations have become increasingly strict, and the demand for lead-free brass bars is expected to expand in the future.

In addition to the KEEPALOY series of bismuth-based lead-free brass bars it has already been selling, KITZ Metal Works Corporation has also released KEEPALOY II, a series with high recyclability. In 2019, the company entered into a licensing agreement with Mitsubishi Shindoh Co., Ltd. (currently Mitsubishi Materials Corporation) for the ECO BRASS® series of silicon-based lead-free brass bars. ECO BRASS® is a global material registered under JIS, EN, and ASTM and demonstrates high corrosion resistance and strength properties.

Initiatives as a Company Promoting the SDGs
KITZ Metal Works Corporation is registered as a company promoting the SDGs in Nagano Prefecture and pursues a number of initiatives to achieve the SDGs. As one of these efforts, since April 2022 we have adopted CO2-free electric power utilizing environmental value derived from hydro-electric and solar power generation (non-feed-in-tariff/non-fossil-fuel certified), and expect to reduce CO2 emissions by roughly 85% compared with before introduction.

In addition, a feature of the brass products manufactured by KITZ Metal Works Corporation is the ease of recycling. By promoting even greater recycling, the company will strive to reduce its environmental impact.
Brass Bar Manufacturing Process

1. Composition and melting of raw materials
   The raw materials are melted in an induction furnace.

2. Continuous casting
   The molten alloy is cast into large ingots (called "slabs" or "cakes") using either a water-cooled horizontal continuous casting machine or a vertical semi-continuous casting machine.

3. Cutting
   The slabs are cut into billets (intermediate products) of predetermined length ready for extrusion, using a large-scale cutting machine.

4. Heating and extrusion
   The billets are heated to the prescribed temperature, and extruded into rods or coils using an extruder.

5. Continuous pickling
   Oxides that have become attached to the surface of the alloy during the extrusion processes are removed by pickling.

6. Cold drawing
   The rods and/or coils are passed through the die of a drawing machine to finish them into brass bars with accurate shapes and dimensions.

7. Straightening and cutting
   Bends or curvature in the bars are straightened out using a straightener. The bars are then cut to the prescribed length.

8. Low-temperature annealing
   The bars are subjected to low-temperature annealing at the prescribed temperature in order to remove residual stress and to adjust their hardness.

9. Measurement, packing and shipping
   Completed bars are bundled and packed to the prescribed weight and/or quantity before being delivered to customers.

Hotel Beniya is also a KITZ Group company.

Suwa, Nagano Prefecture, is the birthplace of KITZ founder Toshio Kitawaza. In addition to KITZ Corporation’s Chino and Ina plants, many of the plants and offices of the KITZ Group are located in the surrounding area, including KITZ Metal Works Corporation and KITZ Micro Filter Corporation.

Hotel Beniya is one of the largest resort hotels in the Kamisuwa Onsen hot spring area and boasts a diverse range of spa facilities, including a hot spring bath with outstanding panoramic views and a fully-equipped ganbanyoku (hot stone spa). The hotel is used not only by tourists, but also by local residents as a place for relaxation.

Hotel Beniya also operates the Suwako Service Area on the Chuo Expressway (outbound) and the Tobu-yunomaru Service Area on the Joshin-etsu Expressway (inbound) serving food incorporating local specialty produce and selling local goods and souvenirs.
Initiatives in the Fiscal Year Under Review (FY2022)
In the fiscal year under review, the outlook was uncertain due to inflation driven by sharply rising material prices caused by geopolitical risks in China and Russia, among other issues. However, we managed to increase net sales and profits year on year, in part due to price revisions and the impact of foreign exchange rates.

Under these circumstances, despite an increase in notes and accounts receivable and inventories due to soaring raw material prices along with higher investment expenditures, we managed to secure free cash flow of ¥1 billion on the back of increased profits. While we issued Sustainability-Linked Bonds, a first for KITZ, to fund bond redemption in anticipation of rising interest rate risks, interest-bearing debt declined by ¥1.3 billion year on year due to loan repayments and bond redemptions. However, partly due to investment expenditures, net interest-bearing debt increased ¥2.2 billion year on year. The equity ratio rose by 3 points year on year to 59%, in part reflecting increased profits and higher translation adjustments. ROE was 10%, achieving the FY2024 target of 8% ahead of schedule. We will continue to maintain ROE at a stable level of at least 9%.

Medium-term Financial Strategy and Capital Policy
In the fiscal year under review, the first year of the first Medium-term Management Plan, we placed a focus on improving return on invested capital over the medium to long term, adopted ROIC management internally to improve the external target ROE and developed an ROIC Tree that links those elements with KPIs in the field. From FY2023 we will implement KPI management and further advance ROIC management. On the profit/loss front, we will strive to improve profitability by visualizing the product portfolio, considering rearrangements, and reviewing unprofitable products. On the asset front, we will make efforts to improve the CCC by reducing inventories and taking other measures while continuing with asset compression efforts, including surplus funds. In addition, to ensure future growth and earnings

Message from the CFO
We will aim to improve the return on invested capital in the medium to long term by adopting ROIC management.

Kenichi Bessho
Executive Officer and Division Manager, Corporate Finance Division

* For the fiscal year ended December 2020, which was an irregular period due to the change in the fiscal year-end, the financial results are for a nine-month period.
potential, we will set strategic investment allocations with a focus on growth fields and new fields such as semiconductors, fine chemicals and hydrogen. We will continue with proactive investment and work to achieve the target ROE of at least 10% as declared in the Long-term Management Vision. Further, to enable contributions to sustainability management, we will also aim to enhance social value by achieving the CO2 reduction targets stated as an SPT*2 for the Sustainability-Linked Bonds issued in the fiscal year under review.

KITZ places an emphasis on improving capital efficiency and shareholder return. At the same time, to respond to changes in the management environment and risks while securing funds for strategic investments, we have set the financial and capital strategy of maintaining an appropriate capital structure that takes into account the ability to procure funds in addition to return on invested capital. More specifically, we will target an equity ratio in the neighborhood of 55-60%, enabling us to improve measures of capital efficiency such as ROE while responding to business risks.

In addition, to enable the implementation of flexible financing including strategic investments and bond redemption, we have endeavored to maintain an A rating for our corporate bonds with the aim of maintaining good relationships with banks while also ensuring sufficient borrowing capacity for the issuance of publicly offered bonds. We have obtained an A- rating from Rating and Investment Information, Inc. (R&I), registered a total of ¥20 billion in new corporate bond issuance capacity and also obtained an A rating from Japan Credit Rating Agency, Ltd. (JCR).

While the majority of the operating cash flow generated over the three years of the first Medium-term Management Plan will be mostly allocated to the investment budget, a positive free cash flow will be maintained over the three years on a cumulative basis. Additionally, while we aim to improve funding efficiency by reducing cash on hand, we will continue to maintain risk response capabilities with a short-term special credit line of ¥13.5 billion from major banks, thus ensuring liquidity on hand.

Shareholder Returns
Returning profits to shareholders is an important management issue, and KITZ has set around 35% of net income attributable to owners of the parent as a preferred consolidated payout ratio level. Dividends in the year under review were a record high of ¥33 per share, resulting in a consolidated payout ratio of 34.6%. We will also consider share buybacks as appropriate, taking into account financial stability, liquidity on hand and the state of investment funding. Also note that a dividend of ¥33 per share is planned for FY2023, and we will pay dividends considering continuity and stability.

The First Medium-term Management Plan Financial Strategy and Capital Policy

- To enhance the corporate value, we have set “improving return on invested capital over the medium to long term” as the core management objective, and are managing ROE externally and ROIC internally as the main KPIs.
- On the other hand, we will execute strategic investments and raise the necessary funds for future growth and ROE improvement.
- We also aim to enhance our social value by promoting sustainability management through the issuance of Sustainability-Linked Bonds.

| ROE target |
|---|---|
| FY2024: at least 9% |
| FY2030: at least 10% |

Introduction of ROIC management:
(1) Profitable improvement
(2) ROIC Tree deployment and PDCA management
(3) CCC improvement and asset compression

Proactive strategic investment: Ensuring growth and profitability for the future

Preservation of optimal capital structure and Ensuring borrowing capacity: Flexible financing and risk response capability

Accumulated Operating Cash Flow ¥38.0 billion yen (FY2022-2024)

- Total investment limit 37.0 billion yen
  (Strategic investment limit 24.0 billion yen)
  - Semiconductors, fine chemicals, hydrogen, DI, and environmental measure
  - M&A

- Keeping previous policy: approx. 35% Share repurchases will be conducted to ensure financial stability and improve the quality of our operations. Consideration will be given as appropriate, taking into account the liquidity on hand and the status of investment funds.

- Preparing for an uncertain business environment
- For strategic investment
- Flexible financing

Target of optimal capital structure

- Risk response capability: Equity Ratio Target 55 to 60 % Commitment line of short-term loans from banks (Current state: 13.5 billion yen)
Sustainability

Message from Director in Charge of Sustainability

We will continue to proactively take on the challenge of new things with the aim to become a 100-year company.

Toshiyuki Murasawa
Director, Managing Executive Officer, Division Manager, Corporate Planning Division

Promoting Sustainability Management
Since its founding in 1951, the KITZ Group has championed regional development in the places it does business and also pursued environmental conservation activities to fulfill its corporate social responsibility (CSR).

We are now in the midst of a great swell, with changes to the global environment never experienced in the past, and phenomenal advances in technology. To continue being a sustainable company under these conditions, we must sustainably grow and enhance corporate value, while at the same time solving social issues and creating social value. Managing these two essential dimensions in tandem are what is expected of us. We believe that this creation of shared value (CSV) is linked with the trust of society. This is what we see as sustainability management.

In the Long-term Management Vision unveiled in February 2022, we placed sustainability management at the core of our management strategy. To coincide with the Long-term Management Vision, we have formulated key sustainability management themes, and in December 2021, a Group-wide Sustainability Promotion Committee was established following a resolution by the Board of Directors. The committee will share priority themes and key performance indicators (KPIs) on a group-wide basis and manage progress toward the achievement of targets.

In our bid to become a 100-year company that achieves growth and development a decade from now, we will continue to actively pursue challenges rather than remaining content with the status quo. We will further evolve the fluid control technologies we have cultivated with valves and aspire to “Beyond New Heights” with a sense of speed and a willingness to take on challenges and build a “New Flow.” As a member of the global community, we will continue to be a company that strides boldly toward 2030 to help shape a society that can be left in the hands of future generations.

KITZ’ Statement of Corporate Mission

Our aspirations for 2030
- Technology/Solutions
- Core Business/Growth Business
- Environmental Conservation through business
- Diverse Human Resources

Long-term Management Vision
Beyond New Heights 2030
Change the ‘Flow’

Action Guide
Do it KITZ Way

Basic Policy on Sustainability
(Keystone of medium to long-term sustainability (ESG) related targets, planning and operation)
- Environment
  + Carbon neutrality
  + Resource recycling
  + Innovation
- Social
  + Sustained improvement in employee engagement
  + Building a sustainable supply chain
- Governance
  + Corporate governance
  + Risk management
  + Compliance

Key Themes for Sustainability Management
Basic Policy and Slogan on Sustainability

The Basic Policy on Sustainability is the keystone of sustainability management, and the Slogan on Sustainability is a guide for employees to recognize and embody the importance of what will change and what will be protected in a rapidly changing world.

- **Basic Policy on Sustainability**

  To realize “KITZ’ Statement of Corporate Mission”, which expresses the KITZ Group’s corporate philosophy, we will work toward the following:
  1. Strive to increase both corporate value and social value by delivering solutions to social challenges through our businesses
  2. Be an enterprise that deserves society’s trust, through realizing efficient, fair, and transparent, highly ethical corporate management
  3. Build unshakeable relations of trust through dialogue with all stakeholders

- **Slogan on Sustainability**

  **Create the Future**
  The KITZ Group will act and take on challenges without fear of change and create a new future aimed at realizing a recycling-based society which is friendly to the earth and people.

  **Preserve the Future**
  The KITZ Group will continuously protect the earth’s finite resources and people’s lives and will work to realize a society in which we can preserve things for the next generation.

Sustainability Promotion Structure

- **Group-wide Sustainability Promotion Committee**

  In December 2021, the KITZ Group established the Group-wide Sustainability Promotion Committee to promote integrated sustainability management throughout the Group. The committee shares the key themes and KPIs for sustainability management and exchanges information on issues and their measures at each company and section, thus managing progress toward the targets. The Board of Directors receives reports on the progress and results and deliberates on improvement measures as deemed necessary.

**In Focus**

Disseminating Sustainability Management and the SDGs Internally Running KITZ Group Sustainability Month 2022

Since FY2021, KITZ has run internal events to promote an understanding of sustainability management and the SDGs as well as provide an opportunity to think about them as their own. In FY2022, KITZ Group Sustainability Month 2022 took place in November. Based on the concept of “learning about sustainability in fun and exciting ways,” the committee members, openly recruited internally, spent four months from organizing ideas to making preparations and operating the event. The highlight of the Month, “Sustainability Site Bus Tours,” offered employees and their families chances to visit different facilities producing energy for in-house use, including a nearby hydroelectric power plant and hydrogen production facility. Another event to promote knowledge about the 17 SDGs was the “SDGs Quiz Stamp Rally.” Participants scanned QR codes on the SDGs icons placed at various locations around offices and plants and took quizzes about each goal, deepening their understanding in a fun way.

Through Disseminating awareness of the SDGs internally, we will promote human resources development that enables each employee to link the company’s sustainability management to their own work, and then think and act accordingly.
Key Themes for Sustainability Management
In February 2022, the KITZ Group announced its Long-term Management Vision. At the same time, we established five key themes for sustainability management and quantitative targets up to FY2030. Each year, the Group-wide Sustainability Promotion Committee checks progress toward these targets.

**E (Environmental)**
KITZ has declared carbon neutrality and resource recycling as one of its key themes for sustainability management and promotes CO2 emission reductions as well as efficient energy and resource usage in an effort to take on the challenge. We will further strengthen our Long-term Environmental Vision “3 ZERO” and disclose information in line with the TCFD recommendations. We are creating innovations with the key concepts of decarbonization and water resources, based on the fluid control technologies and material development that we have cultivated over many years.

*For information about KITZ’s Long-term Environmental Vision and disclosures consistent with the TCFD recommendations, see pages 38 and 41, respectively.

**S (Social)**
In our Long-term Management Vision, we aim to ensure that each and every employee, regardless of gender, age, nationality, or culture, can work in high spirits at maximum performance as professionals. To that end, one of our key themes for sustainability management is continuous improvement in employee engagement. In addition, we work to develop sustainable systems that take into account human rights, the environment, labor, and other concerns not only internally but also in the supply chain.

*For information about KITZ’s employee engagement and supply chain management, see pages 43 and 42, respectively.

**G (Governance)**
KITZ has declared “Do it True” as one of the elements in its Action Guide and engages in fair and equitable corporate activities to meet the expectations and trust of society. Moreover, to “be an enterprise that deserves society’s trust, through realizing efficient, fair, and transparent, highly ethical corporate management” as declared in the second item of our Basic Policy on Sustainability, we conduct management that emphasizes corporate governance, risk management, and compliance.

*For information about KITZ’s governance, see page 50.

Environmental

The KITZ Group has established targets for environmental conservation on a global scale based on its Principle of Environmental Activities and Environmental Action Policy. The Group is making a united effort to achieve a sustainable society.

**KITZ Group Principle of Environmental Activities**

KITZ Group companies aspire to become operations worthy of society’s confidence through the supply of environmentally friendly products and services and promotion of environment-responsive corporate activities.

**KITZ Group Environmental Action Policy**

KITZ Group companies shall recognize environmental issues as an essential perspective of corporate management and every employee shall positively participate in the following activities.
1. Development and supply of environmentally friendly products and services
2. Effective use of resources
3. Promotion of reduction, reuse and recycle of waste
4. Prevention of environmental contamination

**Philosophy and Initiatives for Environment-Responsive Management**

KITZ will conduct activities in accordance with the aforementioned principle and action policy on the basis of achieving a balance between risk prevention and cost reduction. This balance is based on our philosophy that preventing environmental risks such as soil contamination through proactive environmental conservation activities minimizes potential future costs; and that we can reduce other costs and make a broad contribution to society by thoroughly reducing waste generated by our business activities.

Enhancement of corporate business infrastructure

- Group-wide environment-responsive management

Risk prevention

Balanced

Cost reduction

Enhancing management system

- Building the basic structure
- Human resource development
- Visualization

Streamlining action processes

- Group activities
- Application of management system

Reducing environmentally hazardous substances

- Combating global warming
- Common issues (handling of waste and water)
- Care for local communities
- Prevention of future risk

**Long-term Environmental Vision**

It is because manufacturing that takes the environment and safety into account is essential that we formulated our Long-term Environmental Vision “3 ZERO” and tackle three key issues.

Under Net Zero CO2 Emissions, the first key issue, by having all domestic Group companies switch to renewable energy for their electricity by the end of FY2024, KITZ will work toward achieving the mid-term environmental goal of at least 90% CO2 reduction from 2013 levels by 2030, and the long-term environmental goal of becoming carbon neutral by 2050.

Under Zero Environmental Impact, the second key issue, we are working on three themes: effective use of water resources that are closely related to valves; reduction of waste
generated by plants and offices; and promotion of manufac-
turing without organic solvents to minimize not only air and
soil pollution but also the impact on the health of employees.

Under the third key issue, Zero Risk, we are working to
maintain safe and secure manufacturing and stable opera-
tions through activities to prevent occupational accidents,
environmental pollution, and fires.

Initiatives toward a Decarbonized Society

- Switching to 100% CO2-free Electricity at Main
  Manufacturing Facilities in Japan
Starting in April 2022, KITZ has adopted CO2-free Shinshu
Green Denki electricity and makes maximum use of the abun-
dant water resources in Nagano Prefecture in Japan, where
many of the KITZ Group’s manufacturing facilities are located.
KITZ has also adopted CO2-free electricity utilizing the envi-
ronmental value of hydroelectric and solar power (non-feed-
in-tariff/non-fossil-fuel certified) at eight business sites in
Japan. As a result, 100% of the electricity used at these sites is
CO2-free. Going forward, we will continue to systematically
introduce these changes to switch more of the electricity used
by our main business sites in Japan to CO2-free electricity.

- Conversion to LNG Fuels at Ina Plant
At the Ina Plant, Bunker A and LPG (liquefied petroleum gas)
were previously used as energy for boilers and heaters. In
October 2022, a storage tank for LNG (liquefied natural gas)
was constructed in the plant, and fuel conversion started in
January 2023.

By switching to CO2-free electricity and converting to LNG
fuel, CO2 emissions by domestic Group companies in FY2022
amounted to 22,220t, a CO2 reduction rate of 66.2% com-
pared with FY2013 levels. KITZ will continue to reduce CO2 to
achieve the targets of its Long-term Environmental Vision.

*Provisional figures as of March 29, 2023

Developing and Providing Environmentally Friendly
Products and Services

Based on the KITZ Group Environmental Action Policy, we
focus on the development of eco-friendly products aimed at
environmental innovation while enhancing Group synergy. In
addition to implementing evaluations from the technological
development phases in accordance with the Guidelines for
Environmental Impact Reduction Evaluation Standards, we
carry out score-based evaluations of technological develop-
ment activity items (material development, process develop-
ment, design development) in terms of environmental impact
reduction as well as the necessary quality, functionality, and
economic rationalization. In the future, we will build mech-
anism to consider CO2 reductions during evaluations in the
technological development phase.

**Environmentally Friendly Products**

- **Valves for hydrogen stations**
  Ultra-high pressure valves used in hydrogen stations

- **Lead-free products**
  Valves for water and heated water supply made from lead-free copper
  alloy materials that clear lead leaching standards for tap water

- **RoHS Directive-compliant products**
  Products that comply with harmful chemical substance regulations
  such as the RoHS Directive

- **Sterilization, purification and water treatment device (Pureculaser)**
  Water treatment device that sterilizes and purifies water
  through the synergistic effects of ozone, UV rays and photocatalysts

- **Portable membrane filtration device (Aqua Rescue)**
  Temporary equipment for the repair or renovation of existing filtration
capacities and as emergency treatment equipment for the sudden deteriora-
tion of water sources

- **KISOMS (KITZ SMART MONITORING SYSTEM)**
  Preventive solution for valve problems using solar panels
**Environmental News**

- **KITZ Concludes Basic Agreement on Green Hydrogen with Yamanashi Prefecture**

  KITZ signed a basic agreement with Yamanashi Prefecture to collaborate on the use and the wide adoption of green hydrogen as part of demonstration and research into a P2G system in order to develop a hydrogen society.

  Under the agreement, green hydrogen produced with a P2G system at the Komekurayama P2G Demo Site (Kofu City), which is a NEDO-commissioned project, is transported to the Nagasaka Plant and used as fuel for fuel cell-driven forklifts and other equipment at a hydrogen station located in the plant.

* A technology using electricity from renewable energy, etc., to produce hydrogen through water electrolysis.

- **Development of Water Treatment Equipment for the Effective Use of Water Resources**

  KITZ operates KITZ Water Solutions as an activity to comprehensively utilize the water-related technologies, products, and services of the KITZ Group companies and propose solutions to customers. As a result of these activities, KITZ has developed water treatment equipment that purifies groundwater to drinkable levels. The equipment makes use of the technologies of the membrane filtration type water purification system of Shimizu Alloy Mfg. Co., Ltd. and the sterilization and purification treatment equipment of Toyo Valve Co., Ltd., which are KITZ Group companies. Even when the water supply is cut off in emergencies, it is possible to supply groundwater and industrial water as safe and secure water in combination with in-house power generation equipment.

- **Joint Participation in Research and Development of CO2 Separation and Capture Technologies**

  KITZ Group company KITZ Micro Filter Corporation is jointly participating in “Research and development of an effective CO2 capture process with novel CO2 separation membrane modules” as a subcontractor to Tosoh Corporation in a NEDO project.

  The project is designed to develop technologies for a CO2 separation membrane for process gases and exhaust gases with a CO2 concentration of more than 10%, and KITZ Micro Filter is responsible for the development of hollow fiber membrane supports that are ideal for this use, as well as the manufacturing and development of hollow fiber membrane modules.

*1 Project Name: Development of Technologies of Carbon Recycling and Next-Generation Thermal Power Generation, etc. / Development of Technology for CO2 Separation, Capture, etc.

*2 Research and development is being jointly conducted by three parties, Kyoto Institute of Technology, TOSOH Corporation and Tokyo Institute of Technology.

- **Expansion of Solar Power Generating System at Thai Production Site**

  Group company KITZ (Thailand) Ltd. has expanded its solar power generating system as an effort to achieve Net Zero CO2 Emissions, and began operation in September 2022. Solar panels have been installed at the main Bangplee Plant since 2016, but the latest expansion of 2,112 panels brought the total to 3,612 panels.

  The power generated by the solar panels accounts for 10.3% of the average monthly power usage at the Bangplee Plant in 2021, with CO2 emissions reductions equivalent to 753 tons annually.

*Estimated by KITZ based on Japanese standards

**Strategic Pillars**

1. Contribute to climate change mitigation through the reduction of KITZ’s CO₂ emissions and the efficient use of resources and energy
2. Contribute to climate change mitigation by promoting CO₂ emission reductions through KITZ products
3. Contribute to the creation of a sustainable future by working with local communities on climate change mitigation measures
Respect for Human Rights

Basic Concept of Respect For Human Rights and Code of Conduct

The KITZ Group supports the Universal Declaration of Human Rights, an international standard concerning human rights, and has also expressed its support for the United National Global Compact (UNGC). The spirit of the UNGC conforms to the spirit of the KITZ Group’s corporate philosophy, and we strive to put the Ten Principles of the UNGC into practice going forward.

Under the KITZ Group Compliance Code of Conduct, which calls for respecting the individuality and human rights of all individuals, we do our utmost to enable each and every KITZ Group employee to act based on thinking in line with the relevant guidelines, conscious of their roles as members of a global society.

Supply Chain Management

Implementing Supplier Due Diligence

Initiatives on respecting human rights are something we cannot realize alone. To have our business partners understand KITZ’s vision and values and to implement initiatives throughout the entire supply chain, we have formulated Supplier Guidelines and Green Procurement Standards that incorporate items on respect for human rights.

In FY2022, KITZ conducted a survey (self-assessment) of its major suppliers based on these guidelines.

From FY2023 onwards, we will phase in these initiatives at Group companies and develop procurement activities to build a robust global environment and sustainable future as declared in our Corporate Mission.

[Survey Outline and Results]
- Applicable suppliers: 214 key domestic and overseas suppliers selected based on KITZ criteria from among major suppliers related to manufacturing
- Survey details: A total of 21 questions were set based on the Guidelines and the Procurement Standards
- Assessment method: Verification of compliance or non-compliance for each question, and responses to questions pertaining to key issues for FY2022
- Number of respondents (response rate): 203 of 214 companies (response rate of 95%)

Initiatives Supporting Human Resources

Desired Personnel

Through its investments in human resources, the KITZ Group aims to be a company that continues to be the choice of prospective employees.

“Do it True” (referring to sincerity and the truth) is the first Action Guide at KITZ. Being sincere, being serious, and complying with the rules and morals of society are the values that the KITZ Group considers to be the most important. We also consider these values to be the essence of KITZ’s outstanding corporate culture. The Action Guides that follow these are “Do it Now” (referring to speed and timeliness) and “Do it New” (referring to creative ability and challenges). To swiftly respond to a world that is rapidly changing, we need agile business expansion and the ability to come up with and act on ideas that fall outside conventional thinking. We aim to be a professional group that boldly takes on new challenges and where employees can deploy their own latent creative powers.

Human Resource Development

In human resource development, KITZ promotes two themes, displaying human resources competency and displaying organizational capacity. To achieve these themes, we support the development of motivation, skills, and opportunities to demonstrate potential through a wide range of in-house educational programs.

Basic Concept for Human Resource Development

1. We will provide support to those who seek to improve themselves based on self-development.
2. Supervisors will conduct systematic on-the-job training (OJT) with the aim of having employees gain the practical skills and knowledge necessary to properly carry out their duties in the workplace.
3. Education (group training) outside the workplace will be provided to supplement and accelerate OJT.
4. Ongoing human resource development will be pursued by incorporating human resource development into challenge goals (personal goals).
Initiatives toward Enhancing Employee Engagement

KITZ regards constant improvements to employee engagement as one of the key themes of sustainability management and conducts engagement surveys for ascertaining the current state of our organizational culture. In FY2022, these surveys were rolled out to the domestic Group companies in addition to KITZ. Along with being reported to management, the results are provided as feedback to individual workplaces and also utilized to verify and analyze the current state of the organizational culture. Accordingly, we set specific action plans and target figures to improve employee engagement.

*Non-consolidated basis

Initiatives at Main Divisions

Production Division
Theme: Enable employees to feel that “I can do my best for the company” and “Do our best for employees”
- Holding forums for employees to engage in dialogue with the Division Manager of Production Division
- Establishment of a project for working style and workplace environment improvement
- Drafting plans, allocating budgetary funds, and disclosing information on the intranet portal

National Sales Division
Theme: Instill employees with the company vision and improve the human resource development environment
- Having managers share development issues and solutions specific to employee tiers
- Conducting training on coaching, time management, etc.

Engineering Division
Theme: Join forces as “collective wisdom” and instill the idea of “working as a team” to solve issues toward a common goal
- Conducting training on the concept of “working as a team”

Diversity and Inclusion Initiatives

KITZ promotes diversity and inclusion as an important management strategy.

We have declared targets for the percentage of female employees and percentage of female managers to be achieved by FY2030. We are pursuing specific initiatives aimed at achieving these targets.

<table>

</tbody>
</table>

*Non-consolidated basis

Pride Index is an external index based on assessment of LGBTQ initiatives.

LGBTQ Inclusion

KITZ respects diversity in gender identities, sexual orientations, and values. To develop a comfortable environment that allows each employee to fully demonstrate their abilities in their own way, we are striving to foster a corporate culture that is understanding and accepting of sexual diversity among all Group employees. We have started activities to make improvements to our systems and environments for LGBTQ employees and to raise awareness of LGBTQ issues. In FY2022, we conducted an e-learning program to instill an understanding of LGBTQ issues among managers, and in FY2023, we will expand these efforts to regular employees.

Promoting a Healthy Work-Life Balance

To ensure that employees can continue working with peace of mind, the KITZ Group has set targets to enhance work-life balance, support employees with childcare and family care responsibilities, and promote health and productivity management. Through these efforts, we will develop an environment in which employees can achieve harmony between work and private life.

Conducting Briefing Sessions on Childcare Leave

KITZ has worked to develop a range of systems to allow employees to continue working with peace of mind and fully demonstrate their abilities while raising children. We have set a goal of having 100% of eligible male employees taking childcare leave by FY2027. In FY2022, we conducted briefing sessions to give managers a general understanding of our childcare leave systems so that they can become leaders supporting employees who are raising children. Articles about the childcare leave system have also been posted to the intranet portal.
Health and Safety Activities
We promote efforts to ensure zero accidents based on the KITZ Group Safety and Health Fundamental Philosophy and the Safety and Health Fundamental Policies. We have established safety and health committees and we bolster efforts to prevent injuries and illness, promote the development of comfortable workplace environments, engage in healthcare and work to prevent traffic accidents.

KITZ Group Safety and Health Fundamental Philosophy
KITZ places the highest priority on safety and health in all of its activities based on the principle of showing respect for people. Group companies conduct extensive safety and health programs with the goal of zero accident.

KITZ Group Safety and Health Fundamental Policies
1. KITZ maintains stimulating and pleasant workplaces that contribute to the mental and physical well-being of all employees.
2. KITZ is dedicated to ensuring safety and health of all employees by complying with Japan’s Industrial Safety and Health Act and other associated laws and regulations as well as by adhering to internal rules and standards.
3. KITZ improves safety and health management by educating and training all employees with regard to the knowledge and skills needed for safety and health programs.
4. KITZ is dedicated to ensuring the safety of its machinery and equipment so that employees can do their jobs without concern.
5. KITZ reduces exposure to risk factors with the goal of eliminating potential sources of danger and harm to employees in workplaces.

KITZ Group Safety and Health Activities Approach and Initiatives
The company will address safety from two directions: “Enhancement of safety activities and systematic incorporation of prevention measures into production lines” and “Promotion of volunteer activities at workplaces (bottom-up approach via small group activities).” Through this two-pronged approach, the company will encourage a change in every employee’s mindset and increase employees’ awareness with regard to safety, thereby reforming the corporate culture.

KITZ has formulated the following key actions as measures for employee safety and health with the aim of taking preventive steps for safety and improving safety awareness.
- Develop a management system (comply with safety and health related laws and regulations)
- Implement safety measures for machines, equipment and people (prevent similar accidents)
- Create a workplace culture (promote zero accidents)

Enhancement of Health and Safety Management Systems
To promote occupational health and safety management compliance with international standards, in January 2022, KITZ obtained certification under the ISO 45001 standard for Occupational Health and Safety Management Systems for plants in Nagasaka, Ina, and Chino, followed by certification for all production sites in Japan in November 2022.

Education on Health and Safety
With the aim of eliminating occupational accidents, we conducted tiered health and safety training delivered by occupational health and safety consultants. The training is divided into content for employees with limited experience, newly appointed managers and supervisors, and veteran employees who are familiar with the workplace. The training is designed to underscore the importance of safety management and foster a strong awareness of safety.

Reciprocal Audits by Group Companies
Mutual audits regarding the environment, health, and safety of KITZ’s eight Group domestic companies are conducted. Audits are carried out to identify and assess risks, and briefing sessions are held for the officer and the managers of each site. These efforts lead to activities that reduce the spread of and eliminate risks.

In addition, to cultivate personnel who will be responsible for the environment and safety in the future, we conduct training related to the environment, health, and safety.

Health Management
KITZ has been certified as a Health & Productivity Management Outstanding Organization, which is conferred by the Ministry of Economy, Trade and Industry to companies engaging in outstanding health and productivity management activities.
Diverse Human Resources in the KITZ Group

We introduce how employees work to create value at their own posts.

We aim to supply KITZ products to realize a carbon neutral society.

Longtian Piao
Hydrogen Supply & Unit Group, Hydrogen Division, KITZ Corporation

I am responsible for work that covers everything from the development of hydrogen-related products and technology proposals to product delivery. In the course of following one project through to completion, I have accumulated a wide range of experience, and each time I realize that I have achieved personal growth. In the future, I will aim to supply KITZ products across the entire hydrogen supply chain to help realize a carbon neutral society.

I try to convey my experience to other employees for their own development.

Maria Luisa Ribas Steegmann
Managing Director & President
KITZ Corporation of Europe, S.A.

I feel especially pleased when our team manages to overcome a major challenge to help other people so we can satisfy the needs of a customer. The trust placed in me to put me in charge of the management of one of its companies has helped me to grow professionally and improve in other areas during the past 15 years, and I try to convey my experience also to other employees for their own development.

I will adapt to the increasingly diverse roles expected of an accounting department.

Yoshie Suzuki
Manager of Business Transformation and New Business, Corporate Finance Division, KITZ Corporation

Times have changed from the role of accounting as a safe keeper. I hope to respond to the diversification of the roles now expected of an accounting department, including data analysis and support for management decisions, along with taking on the challenge of reforming workstyles in the back office.

I feel happy to be facing new challenges together with fellow KITZ Group colleagues.

Takashi Takagi
Managing Director
KITZ Valve & Actuation (Thailand) Co., Ltd.

I feel happy to be facing new challenges together with fellow colleagues who share the same common philosophy: the KITZ’ Statement of Corporate Mission. Looking ahead, we will continue to engage in new challenges in order to enable us to evolve into a stronger company in the global marketplace, and to contribute to society through our activities.

Having been entrusted with a role of responsibility, I feel a sense of growth and motivation.

Naoki Kira
Manager, Digital Transformation Promotion Group, Production Planning Department, Production Division, Flow Control Business Unit, KITZ Corporation

Employees are now working together on activities aimed at the company’s digital transformation, and I am responsible for promoting this at our plants. Although I am still short on experience, being entrusted with this role of responsibility gives me a sense of growth and motivation on a regular basis. I will continue to work hard to make KITZ better for customers, employees and society.

I want to connect KITZ with customers from the standpoint of sales administration.

Kaori Kikumoto
Osaka Sales Office 2, Osaka Branch, National Sales Division, Flow Control Business Unit, KITZ Corporation

Using my perspective of sales administration, I have been involved in various business activities from the launch of a new IT system to the introduction of order placement systems for our customers. Moving forward, I hope to continue doing work that connects KITZ with its customers in a wide range of ways.
I hadn’t even imagined being posted overseas, and with every new experience I feel personal growth.

Tomoya Nakagomi
Production Control Department Section Chief
KITZ Corporation of Taiwan

When I joined KITZ, working overseas was the last thing I expected. But when I actually began working in Taiwan, I had opportunities to experience many new things, and each time I gained a sense of personal growth. Moving forward, I will keep working to maintain a broad view of the world.

I feel proud to be improving people’s lives.

Marina Tedesco
Chemical Engineer, Environmental Department
Metalurgica Golden Arts Ltda.

I work to improve each process and consider the environment in the areas of chemical engineering, environmental management, and occupational safety. Through involvement with sustainability management, I can contribute to the mission of improving the quality of life of future generations, and I feel proud to work in the KITZ Group.

I hope to fulfill my role with an employee-first spirit.

Yuka Yoshihara
Plant General Affairs and Accounting Section, Administrative Department, KITZ SCT Corporation

In addition to general affairs, accounting, and human resource management duties, I am the contact point for consultations with employees, and I feel the need to acquire a wide range of knowledge in this role. I hope to embrace a mindset of compassion and gratitude with an employee-first attitude while fulfilling a role as a bridge between employees and the company.

I want to help a “culture of learning about technology” take root through technical training for salespeople.

Masanao Takatsuka
Manager, Sales Engineering Department, Flow Control Business Unit, KITZ Corporation

Through involvement in employee training related to technology, I feel that I have improved my own knowledge and understanding, and when I receive words of thanks for providing technical support, it fills me with happiness. I hope to instill a “culture of learning about technology” through the technical training curriculum for salespeople.

I listen to requests from customers and sales companies and support our global sales structure.

Rika Miyasawa
Sales Company Support Group, International Business Development Department, Flow Control Business Unit, KITZ Corporation

From Japan, I support KITZ’s overseas sales companies in managing their sales activities locally and independently. I make a point of sharing the requests from sales companies and their customers and aligning them with the direction we need to take in the future. I hope to keep contributing to the global sales of KITZ products.

I aim to establish quality assurance practices that are trusted by customers.

Kumi Shimizu
Manager, QA Operational Improvement Group, Quality Assurance Department, Customer Satisfaction Division, KITZ Corporation

I carry out business improvement activities that observe compliance requirements and combine practical experience with business transformation. With the goal of establishing quality assurance operations that are trusted by customers, I want to develop an organization that can go about its tasks with enthusiasm.
KITZ focuses its various social contribution activities on areas including regional development (regional contribution), environment preservation, social and international contribution, and culture development.

Participation in the Multi-Organizational Disaster Relief Drill
Environmental Solutions Division participated in the 2022 Multi-Organizational Disaster Relief Drill (organized by Peace Winds Japan) conducted in Aki District, Kochi Prefecture, in December 2022, as part of KITZ Water Solutions’ activities.

At the water supply area of a field hospital set up on the banks of a river, Aqua Rescue portable membrane filtration device by Shimizu Alloy Mfg. were installed to supply water for general use such as showers, saunas and hand washing. In addition, using KITZ Micro Filter’s Super Delios portable water purifiers that can be easily carried around, we purified water taken from the river and promoted that the water could be used to clean wounds or as drinking water.

Participants offered feedback, including “Having Aqua Rescue would offer peace of mind because we would be able to secure sufficient amounts of water for daily use in shelters at evacuation points.”

Comprehensive Partnership Agreement with Chino City and the Graduate School of Project Design to Achieve a “City Chosen by Young People”
In July 2022, KITZ Corporation, together with Chino City, Nagano Prefecture, and Advanced Academic Agency, The Graduate School of Project Design signed an agreement on comprehensive cooperation to realize a “city chosen by young people” based on 2nd Chino City Comprehensive Strategy for Regional Development. To coincide with the agreement, “Project Research into a City Chosen by Young People” through collaboration between industry, academia, and government was launched. Ten researchers, including three from KITZ, worked on a business concept to realize Chino as a livable future city through collaboration transcending corporations and partners for seven months starting in September.

Support for Kitazawa Museum of Art
KITZ supports the activities of the Kitazawa Museum of Art located on the shores of Lake Suwa. KITZ founder Toshio Kitazawa established the museum in 1983 as an incorporated foundation with the aim of contributing to the promotion and development of the regional culture. The museum became a public interest incorporated foundation in 2013 and observed its 40th anniversary in May 2023. The Kitazawa Museum of Art permanently displays excellent pieces of artwork, including some of the world’s best French glassworks made during the art nouveau era at the end of the 19th century and modern Japanese paintings. These works are highly acclaimed both in Japan and overseas.
Yui Susaki

Gold medalist in the women’s freestyle 50 kilograms wrestling competition at the Tokyo 2020 Olympics

Yui Susaki took up wrestling at the age of seven under the influence of her father, who had experience with the sport. In her second year of junior high school, she entered JOC Elite Academy. She achieved victory at the Tokyo 2020 Olympic Games competing while a student of Waseda University. In April 2022, she joined KITZ Corporation. The following is a summary of her achievements since joining.

2022
June: Competed at the Meiji Cup All Japan Invitational Championships September: Won the World Championships in September October: Won the U23 World Championships December: Won the Emperor’s Cup All Japan Championships With her victory at the U23 World Championships, she achieved a world-first “grand slam,” a clean sweep of five tournaments, including the Olympics.

2023
February: Won the UWW Ranking Series Zagreb Open She is currently ranked No.1 in the world. (as of March 31. 2023) (Upcoming Schedule) She is expected to compete at the Meiji Cup All Japan Invitational Championships in June to earn the right to represent Japan at the Paris 2024 Olympic Games.

Relationships with Local Communities:
Promoting Sports in Communities with KITZ Business Locations

Ventforet Kofu

KITZ supports the training academy for (U-18) developing future players as a uniform sponsor.

Matsumoto Yamaga F.C.

In addition to supporting the Academy development organization (Ladies U-15) as a uniform sponsor, KITZ also displays a stadium banner with its company name in the wheelchair seats on the back-stand side of Sunpro Alwin stadium, which is the team’s home ground.

VC Nagano Tridents

KITZ’s logo has been displayed on the back (leg) of the team’s uniform and on training attire. Horizontal banners are also displayed at away match venues.
Stakeholder Engagement

KITZ engages in the timely, appropriate, and fair disclosure of information with all shareholders and investors, as well as with other stakeholders including customers, business partners, employees, and society. During the fiscal year under review (FY2022), we were impacted by the COVID-19 pandemic and accordingly, responded by proactively creating opportunities for dialogue utilizing online solutions. We feed back opinions and requests obtained by constructive communication to the management team, and reflect the outcomes in efforts to improve the efficiency and transparency of management.

**Dialogue with Shareholders**
We seek to disclose information at an early stage, wherein we send the notice of the ordinary general meeting of shareholders earlier than the legal requirement, and the contents are posted on the website prior to sending. The English version can also be read on the website. We are preparing a system that enables our shareholders to exercise voting rights online for their convenience.

**Dialogue with Investors**
We hold financial results presentations for institutional investors and analysts on a quarterly basis. The president or executive officer explains the achievements and the medium and long-term strategy.

Additionally, for the purpose of getting more people interested in becoming a KITZ shareholder, we have taken part in online IR events for individual investors.

**Dialogue with Employees**
The management team including the president regularly visits manufacturing sites and promotes better understanding through communication with employees. We stream video of internal results presentations and messages from management via our intranet portal so that employees at offices in Japan and overseas as well as those employees working from home can participate.

KITZ continues to conduct events promoting dialogue between top management and employees to help instill the Long-term Management Vision.

**Dialogue with Business Partners**
A meeting of presidents of domestic general distributors is held annually, in which we promote mutual understanding and further deepen our partnership with distributors.

While these meetings were postponed due to the COVID-19 pandemic, in July 2022, an “Appreciation Gathering” was held to mark our 70th anniversary.
Governance

The KITZ Group understands the effective functioning of corporate governance to help fulfill our corporate social responsibility and contribute to increasing management efficiency and transparency, as well as sustained increases in corporate value. For this reason, we aim to realize effective corporate governance through maintenance and continuous operation of top management and business execution systems capable of responding to changing business conditions in swift and appropriate ways while also rewarding the trust of all stakeholders and fulfilling our social missions and responsibility.

Organizational Design

KITZ employs as its organizational design for corporate governance the structure of a company with an Audit & Supervisory Board, under which authority and responsibility for decision-making on important matters concerning business administration and for oversight of business execution are centered in the Board of Directors and the Audit & Supervisory Board, and its members provide highly effective oversight of the Board of Directors from independent and objective perspectives, thus ensuring the effectiveness of corporate governance. Additionally, an executive officer system has been adopted to facilitate swift decision-making regarding business execution.

Board of Directors and Directors

The Board of Directors comprises seven members. Four of these members, which make up the majority of the board, are independent outside directors to enhance the management oversight functions. In addition, to ensure diversity on the Board of Directors, one female director (outside director) has been appointed.

Audit & Supervisory Board and its Members

The Audit & Supervisory Board comprises five members, three of whom are outside (independent) Audit & Supervisory Board members in order to facilitate highly effective auditing and strengthen oversight functions. In addition, to ensure diversity on the Audit & Supervisory Board, one female Audit & Supervisory Board member (outside Audit & Supervisory Board member) has been appointed.

Executive Officer

Business execution organization (Divisions in charge and consolidated subsidiaries)
Nomination Committee and Compensation Committee
To strengthen the oversight functions of the Board of Directors and enhance corporate governance, the Board of Directors has established an optional Nomination Committee and Compensation Committee regarding candidates for director, candidates for Audit & Supervisory Board member, personnel matters concerning executive officers, and the compensation of directors and executive officers, as advisory bodies whose members comprise a majority of independent outside directors.

Nomination Committee and Compensation Committee
Chairperson: Independent Outside Director Kazuyuki Matsumoto
Members: Independent Outside Director Minoru Amoh
Independent Outside Director Yutaka Fujiwara
Independent Outside Director Yukino Kikuma
Chairman Yasuyuki Hotta

Ensuring the Effectiveness of the Board of Directors
To improve the effectiveness of the functions of the Board of Directors, a questionnaire survey on the effectiveness of the Board of Directors is conducted among directors and auditors each year.

In the questionnaire survey conducted in February 2023, formulation and implementation of management strategy, sustainability initiatives, constitution of the Board of Directors, appointment and compensation of directors and officers, audits, outside directors, vitalization of discussion at Board meetings, and response to shareholders, investors, and other stakeholders were asked. Feedback regarding discussions at Board meetings was also collected.

The result of the evaluation says that the effectiveness of the Board of Directors is ensured in general. Constructive feedback was also obtained regarding enhanced employee engagement, business portfolio management, improvements to the price-book value ratio, and other matters. In light of these evaluation results, the Board of Directors will share these issues and consider improvement measures in an effort to ensure greater effectiveness.

* Program for Restricted Stock Compensation and Post-paid Performance-Linked Stock Compensation for Directors (Not including Outside Directors)
Executive Officer System and the Management Conference

The Group employs an executive officer system for cross-functional business execution regarding Group companies in Japan and around the world to focus the Group’s comprehensive strengths on corporate strategy. Thirteen executive officers, including those serving concurrently as executive directors, are appointed. In addition, the Management Conference consisting of executive officers, meets monthly for broad-ranging discussions of important management topics and decides on important matters related to business execution.

Establishment of Various Committees

To enhance the effectiveness of the internal control system operation, KITZ operates various dedicated committees. Through these committees, KITZ implements necessary controls such as evaluation, check and balance, and improvements on important matters related to appropriate and lawful decision-making in Group management.

Executive Compensation

KITZ’s policy regarding the details of compensation given to individual directors is to determine compensation amounts consistent with business performance while also taking into account factors such as compensation levels at other companies, the main objective of which is to increase motivation toward achieving the Long-term Management Vision and Medium-term Management Plan, and enhancing the corporate value of the KITZ Group.

As for the structure of compensation, it comprises monetary compensation in the form of “base compensation” and “performance-linked compensation (bonuses),” and non-monetary compensation in the form of “performance linked stock-based compensation.”

Base compensation is paid as a fixed amount and is set based on the position and responsibilities of each director. Performance-linked compensation (bonuses) is paid out of an amount equivalent to 1% of net income attributable to owners of the parent (the total amount of bonuses) when certain requirements are met, and is paid based on the position and individual performance target achievement level for each director.

Performance-linked stock-based compensation involves a portion of compensation being granted as stock in the Company based on an amount calculated according to the position of each director and performance indicators, with the aim of increasing the awareness of contribution to KITZ’s medium to long-term business performance and improved corporate value, and promoting greater sharing of value between directors and shareholders.

Outside directors are only paid base compensation, in light of the fact that they are in positions independent from the execution of business.

Each fiscal year, the Board of Directors determines details including the compensation of individual directors based on deliberations and reports from the Compensation Committee in order to ensure the objectivity and transparency of executive compensation.

Also note that the compensation of Audit & Supervisory Board members comprises only base compensation as fixed amounts, and the payment amounts are determined through discussions by the Audit & Supervisory Board.

Sale and Reduction of Cross-Shareholdings

KITZ basic policy is to not maintain cross-shareholdings for the purposes of securing stable shareholders.

In addition, the Board of Directors annually verifies and reviews cross-shareholdings from the perspectives of both economic rationality (quantitative perspectives) and the qualitative significance of such holdings, and share issues judged not to satisfy the Policy on Cross-Shareholdings are sold.

Internal Control System

To establish sound and strong Group management foundations, KITZ has established a Basic Policy on Internal Control. KITZ has built and currently operates an internal control system in accordance with laws and regulations.

In addition, the Internal Audit Office conducts business audits and internal control audits of KITZ and the KITZ Group companies, as well as monitoring the group-wide state of internal control and appropriateness of business processes. The results of the audits are communicated to the president, Audit & Supervisory Board members, and related sections, and follow-up is conducted regarding corrective measures.
These are reviewed closely by the Internal Control Committee and reported to the Board of Directors periodically. In addition, we identify the inherent risks by conducting audits regarding the serious risks that each Group company is facing. We also provide support for improving operations and building structures for legal and regulatory compliance to avoid and mitigate risks.

**Promotion of Compliance Management**

KITZ recognizes compliance management as a fundamental and essential condition of continued corporate growth. This is expressed in the topmost element of the Action Guide for the realization of KITZ’ Statement of Corporate Mission, which expresses the Group’s corporate philosophy: “Do it True.”

**Compliance Management Promotion Structure**

In the KITZ Group, both KITZ and each Group company have established a Crisis and Compliance (C&C) Control Committee chaired by the president. It also is building structures to prevent various management risks, such as those associated with legal, regulatory, and compliance violations, and to respond swiftly and appropriately to any crises that may arise.

**Initiatives Related to Promotion of Compliance Management**

The C&C Control Committee at KITZ and each Group company deliberates on the following matters related to promotion of compliance, formulates necessary policies, and implements specific measures.

<table>

</table>

**Whistleblowing System (Compliance Helpline)**

To promote compliance management, KITZ and each Group company have established compliance helplines as a contact point for reporting and consultation concerning information about any acts in violation of laws, regulations, or compliance identified by management or employees.

The management and employees of KITZ and each Group company may use their own companies’ compliance helplines, compliance helplines set up by outside law firms, and the compliance helpline of the parent company, KITZ. We secure a structure that the management and employees can use with peace of mind, by setting up multiple routes for consultation and reporting.

Each compliance helpline is managed and operated by the C&C Control Committee of the Company or the Group company. Reports and consultations received are investigated swiftly while strictly protecting the confidentiality of the reporting party, and timely and appropriate corrective measures are implemented in response.

**Compliance Education**

KITZ distributes a group-wide Compliance Guidebook to the management and employees of KITZ and Group companies. The guidebook describes the thinking of Group top management regarding compliance management, the importance of compliance management, the compliance promotion structure, the compliance code of conduct, the whistleblowing system, and other matters related to compliance. In FY2022, the guidebook was revised to enhance descriptions of social issues such as human rights, labor, the environment, and anti-corruption. The revised edition was translated into the languages of each country in which the KITZ Group operates and thoroughly informed throughout the Group. Japanese and English editions were also published on the KITZ website.

We also hold seminars on compliance education systematically each year and individual seminars focusing on the details of the operations of each section when so requested by a section of KITZ or a Group company. Furthermore, we also strive proactively to foster a culture of compliance, raise awareness, and convey related knowledge through various other means, such as preparing and distributing educational and awareness-raising tools and, recently, deployment of digital content using online tools.
Compliance Survey
To check the degree to which compliance management has taken root in KITZ and each Group company and visualize potential compliance risks, KITZ surveys employees on compliance.

The risks identified through this survey are utilized in such efforts as business process improvements and employee education in accordance with their degrees of importance.

Risk Management
To control various risks that could have severe impacts on corporate management, KITZ carries out risk management in KITZ and each Group company.

Risk Management Structure
In the KITZ Group, the executive officer in charge of risk management, who also serves concurrently as a member of the C&C Control Committee, promotes risk management at KITZ and each Group company based on basic policies decided on by the committee under the supervision of the Board of Directors.

Risk Analysis and Evaluation
In the KITZ Group, the importance of anticipated risks related to business activities (totaling 128 risk items) is judged quantitatively along the two axes of their frequency of occurrence and their impact on management based on the basic policy and evaluation standards for risk evaluation formulated by the C&C Control Committee. Specifically, risks are graded by each evaluation item under the standards for determining their frequency of occurrence and their impact (consisting of the items of human injury, physical damage, liability, loss of profit, loss of trust, and environmental damage), and each is grouped into one of the four zones of high-damage/high-frequency, low-damage/high-frequency, high-damage/low-frequency, or low-damage/low-frequency based on a four-quadrant risk-mapping scale.

Risk Management Implementation Flow
Based on the results of risk evaluation by each organization and through the Management Conference, the KITZ Group identifies important risks and key risks that have a particularly high possibility of significantly impacting management among the important risks, chooses whether to address each risk through avoidance, transfer, mitigation, or retention in light of its importance, and drafts and implements necessary countermeasures under the responsibility of the individual executive officers and Group company presidents.

Particularly in recent years, the Group has been identifying and taking action flexibly on key risks in accordance with social conditions, such as control measures for supply chains in light of geopolitical risks as well as information security risks.

Important risks and key risks thus identified, and countermeasures drafted for them, are shared with the Internal Audit Office. The Internal Audit Office evaluates the state of development and operation of risk management from an independent perspective through means that include checking on the progress and results of related countermeasures through business auditing and other activities.

In addition, based on reports on such matters as priority risks identified in the Management Conference and countermeasures drafted for them, as well as the results of evaluation by the Internal Audit Office, the Board of Directors carries out necessary deliberation and checks on the ultimate results of implementing countermeasures, among other activities involved in final decision-making on and oversight of risk management in the Group.

Information Security and Personal Information Protection
To minimize the impact of cyber-attacks or information leakage from insiders on business continuity, the KITZ Group has considered information security governance as a key management issue. Accordingly, we have formulated KITZ Group Information Security and Personal Information Protection Policy, established an Information Security and Personal Information Protection Committee, and undertaken various measures for information security and personal information protection.

Please visit the website for more information on KITZ’s risk management activities.

Jan. 2022 Executive Officer, General Manager, Business Promotion Center, Flow Control Business Unit
Jan. 2023 Executive Officer, General Manager, Business Promotion Center; In charge of Hydrogen Division (present position)
Already a year has passed since the excellent Long-term Management Vision and Medium-term Management Plan were announced. As the systems to implement them and the necessary investments have also been given full consideration, let’s achieve the Long-term Management Vision for 2030 and enhance the corporate value of the KITZ Group. I also encourage the Group to fully consider the technology roadmap, place a greater emphasis on the customer perspective while regularly revising it, and steadily implement technological development that actively reflects points of contact with the outside.

The business of KITZ is deeply connected with the growth markets of water, energy, and information and is essential to people’s daily lives, both directly and indirectly. That is why we should look forward to exceptional growth in the future.

I hope to work together to make the KITZ Group an organization that all stakeholders see as attractive in the long term, with the aim of putting into practice the KITZ Action Guide of “Do it True,” “Do it Now,” and “Do it New” and achieving remarkable growth.

As an outside director, I intend to pose high-quality questions regarding various management issues and follow up on those issues to contribute to the realization of the Long-term Management Vision and Medium-term Management Plan.
I will contribute to sustainable growth to enhance corporate value.

Minoru Amoh  Outside Director

I believe that an outside director has important roles to play in offering differing opinions and approaches, driving tough decision-making, and contributing to the selection of successors for important positions. To ensure these roles function effectively, it is important to closely communicate with inside and outside officers, understand the logic behind actions on the execution side, and have a good knowledge of the corporate culture. To enhance corporate value, which is the greatest responsibility of a company, I will be involved in medium to long-term strategy and contribute to sustainable growth.

KITZ is currently in the process of establishing global management foundations and is striving to harness world-class technologies and production innovations to deliver solutions to customers while pursuing sustainable management, adapting to energy shifts and a recycling-oriented society, and establishing a solid position in growth markets. KITZ is also working to visualize global supply chains, invest in labor savings, and boost labor productivity while pursuing workstyle reforms and striving to become a company where employees can work in better health and safety.

KITZ is also promoting a structure of company officers that takes into account diversity, specialization, and overall balance, important elements for further enhancing corporate governance, and at the same time is thoroughly implementing risk management and global compliance and making every effort to ensure management transparency.

I will continue to take on challenges.

Yutaka Fujiwara  Outside Director

In FY2022, business performance rebounded, and ROE, an indicator of capital efficiency, also returned to a level above 8% expected by the market.

In April 2022, KITZ moved to the Prime Market of the Tokyo Stock Exchange. About a year and a half since then, while still having some way to go, KITZ has made steady strides to becoming a company befitting the Prime Market, namely a “company committed to achieving sustainable growth and improving corporate value over the medium to long term as well as maintaining appropriate levels of market capitalization (liquidity) to be investment instruments for many institutional investors.”

To continue improving ROE going forward, KITZ has been working not only to expand its business but also to revise unprofitable products, slim down its assets, and improve capital efficiency from the front lines up with the adoption of ROIC.

At the same time, KITZ has been making company-wide efforts to create a company that fulfills the dreams of employees and all stakeholders, one that is friendly to the environment and respects diversity. As a member of the Board of Directors, I also hope to be actively involved in taking on these challenges.

An organization in which each person can shine

Yukino Kikuma  Outside Director

As work isn’t something you can do alone but a team effort, it naturally demands cooperation. But if that is taken to mean that “people should be malleable,” an organization will not grow. Always looking to hire people with the potential to surpass you and steadily giving opportunities to that junior talent is essential for sustainable growth.

KITZ regularly reports on the progress of its talent management system. This shows what management wants each employee to experience at any given time and where it wants them to end up. While KITZ has not yet produced a female officer internally, the progress of female employees succeeding in each department can be monitored through these reporting sessions.

However, the results of KITZ’s employment engagement survey showed some room for improvement in terms of positive attitudes toward work and expectations of the organization. There may be a disconnect between what senior management wants and how that is received by employees. I believe it will be necessary to pursue further reforms in order to properly accept honest feedback from employees, develop an environment in which each employee can fully realize their potential, and offer a fulfilling work experience for the employees who have chosen to work at the KITZ Group.

Number of Mid-Career Hires

- [Data chart showing the number of mid-career hires from 2017 to 2022]

*1 Changed to final figures
*2 Provisional figures as of March 29, 2023
*3 Applies to process water related to the manufacturing of valves, etc.
*4 Industrial waste + general waste + valuable materials
*5 All employees + temporary employees

Base year: 2013
The fiscal year ended December 2020 is an irregular nine-month period due to the change in the fiscal year end. Aggregation periods: Fiscal year ended March 2014 to fiscal year ended March 2020: April to March, Fiscal year ended December 2020: April to December, Fiscal year ended December 2021: January to December. However, CO2 emissions, water resource usage, waste generation, total working hours and frequency rate for the fiscal year ending December 2020 display the results for the 12-months from January to December 2020.

Aggregation scope: CO2 emissions, water resource usage, waste generation for the fiscal year ended March 2014 to the fiscal year ended March 2019 are for domestic Group companies except for KITZ domestic business sites and Hokuto Giken Kogyo, and for the fiscal year ended March 2020 and thereafter are for KITZ domestic business sites and domestic Group companies. Number of employees is for KITZ and all Group companies. Number of new hires, percentage of employees taking childcare leave, percentage of employees with disabilities, and total working hours are for KITZ on a non-consolidated basis. The frequency rate is for the production sites of KITZ and its domestic Group companies. Number of patents held is as shown in the legend.

- **Percentage of Female Employees, Female Managers**
  - Female employees
  - Female managers

- **Percentage of Employees Taking Childcare Leave**
  - Male
  - Female
  - Overall

- **Percentage of Employees with Disabilities**

Corporate PR Character

Kikumaru is a PR character, designed around the motif of the Chrysanthemum-Handle* (see Page 30 Focus), created to improve the KITZ corporate brand. The character is used at trade expo booths and in sales promotion tools, and is also actively utilized in all manner of promotional situations as a corporate PR character.

Name: Kikumaru  
Date of birth: October 3, 2007  
Gender: N/A  
Personality: Sincere and honest. Active, and full of the spirit of challenge, but sometimes clumsy.  
Kikumaru spends its days busy travelling throughout Japan and around the countries of the world as an outstanding KITZ sales representative.
