Completion of New Plant Building at KITZ SCT Nitta SC Plant, Expands Production Capacity of Valves for Semiconductor Manufacturing Equipment

KITZ Corporation and its wholly owned subsidiary, KITZ SCT, which manufactures and sells valves and joints for semiconductor and FPD manufacturing processes, have completed construction of a new plant building at the Nitta SC Plant (Ota City, Gunma Prefecture) as part of strategic investments under the Long-term Management Vision. The completion ceremony was held on March 31.

The new plant building will be equipped with automated production facilities to increase production capacity for the semiconductor manufacturing equipment market. In addition, the new product development evaluation area will be expanded to speed up the introduction of new products into the market.

■ Overview of New Plant

Location	: 150-2 Nittakanecho, Ota City, Gunma Prefecture, Japan (on the premises of Nitta SC Plant)
Production Item	: Valves and joints for semiconductor / FPD manufacturing processes
Total Floor Area	: 10,500 square meters
Building Overview	: Steel structure, three stories aboveground
Operation Start Time	: April 2023
Total Investment	: Approximately 3.4 billion yen (including investment in production equipment)

Furthermore, the company cafeteria has been moved to the third floor of the new building. It has been redesigned as a bright and relaxing place for employees to enjoy the surrounding scenery with a new menu.
